Pit deputies' threat to halt the coal industry next week

from next Thursday, when 16,000 pit deputies are expected to join the miners'

• A police sergeant has described how she was stoned, kicked and beaten by a mob besieging the police station in a Yorkshire pit village

• Fears of further pit action combined with a stronger dollar to push the pound below £1.20

helping the Government to break the miners' strike, Mr John Alderson, former chief constable of Devon and Cornwall, has

The coal industry, largely appeal tribunal on pit closures paralysed by the miners strike in the abortive talks conducted now in its thirty-second week, faces total closure from October 25 because of the walk-out threatened by 16,000 pit depu-

A decision to strike from 6am on that date was taken by the ten-men, executive of the National Association of Colliery Overmen, Deputies and Shotfirers (Nacods) yesterday after-the collapse of peace talks two

days ago.
Nacods members are responsible for safety tasks under laws governing underground working and without them the industry is expected swiftly to grind to a halt. The union is due to give the National Coal Board seven days' notice of strike action this morning, and two weeks' notice of withdrawals of safety cover.

Mr Peter McNestry, the union's general secretary, last night returned to Nacods headquarters in Doncaster to send out notice of the industrial action, which will be put to area meetings next Wednesday.

In a secret ballot last month the pit deputies voted 82.5 per cent in favour of a strike on a three-question voting paper which included their own battle with the coal board about not being paid for refusing to cross National Union of Mineworkers' picket lines, and the wider controversy over colliery

The board has conceded the ssue on payment for deputies who refuse to cross picket lines, withdrawing guidelines to area management, it sought to avert

Thatcher and Kinnock unite against IRA

must continue to search for

The Prime Minister and Mr Neil Kinnock stood together in the House of Lords yesterday in a display of unity and defiance of terrorism as Lord Whitelaw made a statement about last Friday's bombing of the Grand Hotel, Brighton. Mr Kinnock, who had earlier

been sitting on the steps of the Throne at the other end of the Chamber moved round to the Bar of the House to stand with other senior figures, including Mrs Thatcher; Mr John Biffen, leader of the Commons; Mr John Gammer, Conserva-tive Party chairman; and his colleague Mr Peter Shore, chief Labour spokesman on trade and industry, whose opposite number, Mr Norman Tebbit, was injured in the blast.

The Lords, returning after the summer recess, was packed as Lord Whitelaw, deputy prime minister, said that an evil group had deliberately struck at the heart of the nation, but that they would find that they had "strengthened the overwhelmingly united resolve of a Government, Parliament and people determined to preserve their free He promised that the cir-

comstances of the bombing were being studied with meticulous care and the security implications explored to the

Lord Whitelaw, who dis-closed that parts of the police inquiry into security at the Grand were likely to be published, gave brief details of the attack, named those died, offered sympathy to the bereaved, and expressed admirservices' work.

He then repeated his view that "total, impregnable secu-ity is not compatible with the

improvements in security arrangements but without calling into question the entire basis upon which public life in this country is conducted. Lord Whitelaw also said that

Westminster had been tightened up after discussions between the parliamentary authorities and local property and the parliamentary authorities and local property and Newman, Metropolitan Police

It was apparent yesterday that there were far more police on duty inside Parliament and more security staff checking cars and baggage. Shortly before Lord Whitelaw's statement security guards carried out detailed checks in the Commons press gallery.

There were cheers as Lord Cledwyn of Penrhos, leader of the Labour peers, said that in a free society a criminal attack upon one political party was an attack on all other parties. "An attempt to kill or injure the Prime Minister and members of an elected government is a profound affront to everything this country believes in and values. It is a wicked and grave

From the Alliance benches Lady Seear said: "If politics has become more dangerous we must take all the sensible steps we can to make it safer, but we must ot allow ourselves to be defected from our main purpos-

Lord Whitelaw said that the support and encouragement of opposition parties had re-emphasized that those who perpetrated action like the bombing would meet with the implacable bostility of a united Parliament and people.

Tebbit speaks of 'sheer horror' of bombing

By Chris Moncrieff of the Press Association

Secretary of State for Trade and Industry, spoke for the first time yesterday about the "sheer horror" of the Grand Hotel bomb attack in Brighton early on Friday morning.

Mr Tebbit, who said he felt "a little bit ragged" was, however, unable to describe the events immediately after the explosion when he was dug out of the rubble after being buried for nearly four hours.

He was sitting up in bed surrounded by more flowers than the hospital staff can ever remember having been sent to a

single patient.

Beside his bed was a mountain of mail, messages of good will from thousands of people, all over the country, and beyond. "I will let you know

Mrs Margaret Tebbit, paralysed from the neck down in the Mini Norman Tebbit, the Brighton bombing, has receretary of State for Trade and gained some feeling in her arms and legs, a hospital bulletin said last night, although her condition was "generally unchanged". It was not likely that further indication of her recovery prospects would be avail-able for some time.

> how many there are by the kilo when I come out," he said. But he avoided all reference

to the trauma he suffered when the explosion occurred, also yesterday in the Royal Sussex seriously injuring his wife County Hospital, in Brighton, Margaret, who lies in the same hospital still paralysed from the neck down. Mr Tebbit, his face still

bruised and scarred and his left hand heavily bandaged, seemed far more subdued than I expected. The adjective "chir-

Solicitors in search of better image after 'disastrous' 18 months

By Frances Gibb, Legal Affairs Corresponden

Law Society has ap-pointed a leading company of consultants, oopers and Lybrand Associates, to carry out the first, adical review of the society's vork, functions and organiza-

The review is being conduc-ted in the wake of what is widely held to have been a disastrous 18 months for the solicitors' professional body. As well as losing the conveyancing monopoly, the society came in for heavy criticism over the Glanville Davies affair, the case of the former council member struck off after overcharging a client by £131,000.

Yesterday, Mr David Miller. joint deputy managing director of Coopers and Lybrand's consultancy section, said: "The review stems from the difficulties the society finds itself in on

"Obviously the image of the society is not right. There is concern within the profession and by the public about the way solicitors carry out their business; and one has to recognize

that there is a public interest announced the impending element in the role of a review.

But he added that it was an "extremely positive step" that the profession was prepared to lay itself open to scrutiny in a way that not many professions would do. "All the professions are undergoing major change at present, so this is a marvellous

opportunity for the legal pro-fession to position itself for the future at a time of moves towards property selling, multi-disciplinary offices and when legal services are going to assume greater prominence. The consultants will start on a three-part review envisaged by

the Law Society, looking at its role and functions. This will start next month under a team of eight and cost up to £89,000. They will work to a Law Society steering committee which includes outside members such as Lord Bancroft, formerly head of the Home Civil Service. The committee chairman is Sir Christopher Hewetson, last year's president, who first

The consultants are expected to recommend radical changes in the society's organization.

and will look at how it carries out its functions, such as acting as a trades union for solicitors and disciplining and regulating the profession. They will decide how much

conflict there is between those and jobs such as running the legal aid scheme and recommend changes, which Mr Miller said he hoped to see implemented. "We are not interested in doing studies to sit

In a new approach, they will invite "evidence" from interested parties, both the profession and public, followed by oral hearings from some who have submitted evidence round the country in the company's offices. "At the end of it we should be able to make proposals for changes in the society's framework to bring solicitors forward into what will be a very different next 10 years," Mr Miller said.

The Brighton bomb

Optimism over Mrs Tebbit

Brighten

The hospital bulletin on the seven injured victims of the Brighton bomb explosion issued last night indicated signs of optimism for Mrs Margaret Tebbit and Mr John Wakeham, the Government Chief Whip.

The bulletin said that the condition of Mrs Tebbit, wife of the Secretary of State for Trade and industry, was unchanged but "there has been some partial recovery of sensation in her limbs. It is not likely that a firmer indication of her prospects of recovery will be available for some time".

Mrs Tebbit was said to be cheerful. She was paralysed below the neck after the blast at the Grand Hotel last Friday.

She was seen yesterday by her husband and although there were suggestions Mr Norman Tebbit would leave hospital this week, the statement, from the Royal Sussex County Hospital. said it was unlikely he would be discharged until next week at the earliest.

The bulletin said Mr Wakeham was in intensive care, where his wounds were inspected and dressed. The muscles in his legs were found to be in better condition than expected and the vascular system, of blood vessels, was intact. The MP's legs were immobilized in plaster of paris. The bulletin said: "No bones were broken. These findings suggest a prospect of good

Peers' last stand on police Bill

By Our Legal Affairs

The Government will face a determined, last attempt tomorrow by Opposition peers to force a change about the proposed new rules which would enable the police to den; access to a solicitor for certain suspects in police custody.

Under the new rules, con-tained in the Police and Criminal Evidence Bill, police can deny legal advice to suspects for up to 36 hours in the case of a serious arrestable offence.

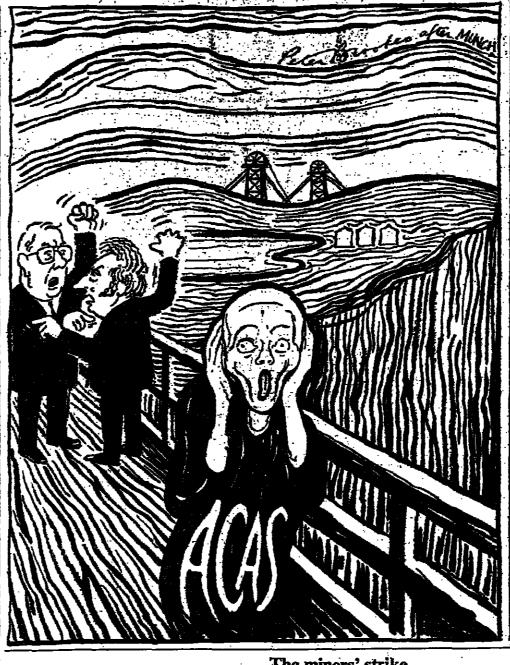

But Lord Misheon, the Labour peer, Lord Elwyn-Jones, the former Lord Chancellor, and Lord Hatchinson of Lullington, the SDP/Alliance peer have tabled amendments for debate at the Bill's third reading which would give solicitors greater access to suspects. The Law Society tried to

reach a compromise solution in talks with the Home Office when it put forward several options aimed at enabling solicitors to see suspects while meeting police fears about leaks via lawyers to other crimmals.

However, no agreement was reached and the society hopes the Government will be forced to change its stance at the third reading in the Lords.
Lord Misheon and Lord
Elwyn-Jones are tabling a

blanket amendment that there be no restriction at all on a suspect's right to see a solicitor except in terrorist cases. They are also tabling a

second amendment under which solicitors would be allowed to see suspects but police have power to serve them from communications information received. The Bill is expected to receive Royal Assent by the end of October

Gas-cooled

reactor option 'open'

By Our Energy Correspo The electricity supply industry, has not abandoned its research into or enthusiasm for advanced gas-cooled muclear reactors because of its proposed pressurized water-cooled reactor at Sizewell, the public inquiry was told yesterday.

Mr John Baker, one of four full-time members of the Central Electricity Generating Beard, said that the option to build further AGRs would not be prejudiced by the proposal or by building similar PWRs.

Opponents of water-cooled reachers say that gas-cooled ones are a viable alternative, pointing to the success of the Hunterston AGR in Scotland which is helping the South of Scotland Electricity Board to meet 40 per cent of demand from nuclear stations. The board, which is building an-other gas-cooled reactor inver-ness, is also exporting nucleargenerated power to England and Wales.

Mr Baker said that work on existing gas-eduled reactors, provided a solid basis on which to launch a further one. Those in England are operating at helping to preserve coal stocks.

He said that the AGR option could be kept open because of the availability of fully-documented design.

However, Mr Baker argued that a pressurized water-cooled reactor could be between £30m and £50m a year cheaper. Subsequent PWRs would also e more economical.

Record advance sales claimed for cook book

The BBC yesterday claimed to have achieved the highest sale in advance of publication for any non-fiction book published in Britain. The book is a primer in Oriental cuisine, Ken Hom's Chinese Cookery.

Bookshops have already ordered a quarter of a million

copies, an investment on their part of £1.25m.

The book, which is to be published on October 25, accompanies a BBC2 television series starting on October 29, and follows the model set by Madhur Jaffrey's Indian Cook-err, the book of which topped the best-seller charts for weeks.

Duke of Wellington's photograph goes up for sale

The Dake of Wellington, who hounded Napoleon out of the Peniasula and defeated him at Waterloo, going on to achieve renewed greatness as an "iron"
Tory prime minister, would nomally
be thought of as a figure predating the era of photography. However, he sat for a Daguerreotype portrait in London on May 1, 1844, to Antoine Claudet, a pioneering practitioner of the art invented a year or two earlier by Daguerre. The duke was 75 (Geraldine Norman, our Sale Room Correspondeat writes).

Only two prints of the photograph are known to exist, and one of them comes up for sale at Sotheby's en Friday, October 26.

Sotheby's have tried to piece its

present owner, Mr EJ Denny, He appears to have bought the oval print, which has a gilt matt mount and is enclosed in a plush-lined red. leather case, at a Sotheby's sale either just before or just after the Second World War. The other known print of the

daguerrectype still belongs to the Wellington family, but it is not clear who originally commissioned the portrait. A minor print publisher of the day, Mr J Watson, of Vere Street, seems to have been behind it. An article in The Times for May 22, 1845, records that a portrait in oils was painted from the daguer-roctype and that Watson gave them to a Mr Ryell to engrave a plate from them.

cast the risks of smoking. warning on cigarettes moved from the side of the packet to the front and the wording toughened to include [brand names], for example: These cigaretics can kill you, by

Dr John Harvard, secretary of the BMA, said: "Advertising, sports and arts sponsorship, competitions, clothes bearing brand names and holidays are all part of the industry's attempt to fool their consumers into believing smoking is glamorous; healthy and desirable.

These same consumers are our patients, and we know the truth.: that smoking causes appalling illness and so many unnecessary deaths that the figures of 100,000 premature deaths a year is almost beyond comprehension".

The time had come, he said, when doctors must speak out "or be guilty of collusion. Every day we delay in banning the promotional activities of this industry, on average another 274 premature deaths occur".

The campaign is the first time taken on the tobacco industry. Dr Harvard said that the campaign was not an attempt to interfere with the freedom of the individual to smoke, but to end the promotion of cigarettes and tobacco. "We regard this as a vital piece of public health legislation."

Villagers campaign to stop Army building site for urban warfare training

By Michael Horsnell

Until recently the wickedness most likely to rouse the emotions of villagers at: Wre-than in Norfolk was encapsu-lated in the fable of the Babes in the Wood which originated in neighbouring Wayland Woods. It was here that the infant heirs to the de Grey estate were taken out to be slaughtered on the order of a wicked nucle seeking to inherit what was rightfully theirs.

But last month the Ministry of Defence assumed the mantle of villain of the piece, rousing 400 villagers from their customary rural equanimity. The ministry is plausing to build a simulated batthe village to enable troops to train in urban marfare techniques The ministry plans to build

about eighteen mock houses and 2 church. These will then be subject to attack by 150 soldiers at a time, with airborne and tank support, using blank ammunition and phosphorous flares in day and night fighting.

The four acre battle village is to be built on the sandy heath of Thetford, which the ministry believes simulates conditions in. West Germany. It will be on the west Germany. It will be on the southern perimeter of the ministry's Thorpe Camp, Stand-ford Battle Area, a 25 square-mile training camp established during the Second World War-for the training of recenits for the training of recruits.

The villagers have peacefully coexisted with the camp for the past forty years with the soldiers regularly enjoying the pleasures of the Dog and Partridge public house and using local facilities.

Rut the house relationship is But the happy relationship is

PARLIAMENT October 16 1984 Whitelaw: Brighton bomb has strengthened our resolve

Dr Patei: An impressive

TERRORISM

The bomb attack on the Grand Hotel in Brighton last week by the IRA had simply strengthened the overwhelmingly united resolve of ibe Government Parliament and people determined to preserve their free democracy. Viscount Whitelaw. Lord President of the Council, said in a statement to the Lords as the He said that he knew peers would

icon him in offering deepest sympathy to those who had been so tragically bereaved, as well as their heartfelt desire that those injured might soon be restored to health cannot express too profoundly the concluded) my admiration of the courage, dedication and selfless devotion to duty shown by the police, the fire and ambulance services, the hospital staff and all those involved in those difficult and dangerous hours immediately after the explosion occurred.

Vaturally there has been much discussion about the security arrangements in place at the time of the explosion. The Chief Constable of Sussex Police has appointed the County Chief Constable of Hampshire to inquire into this aspect and I do not believe that it would be right for us to speculate on the

outcome of the inquiry.
I have already made known my view that total, impregnable security is not compatible with the free society we enjoy. We must continue to search for improvements in security arrangements but without calling into question the entire basis upon which public life in this country is conducted.

The circumstances of this outrage are being studied with meticulous care and the security implications will be explored to the full.

An evil group has once again planned and carried out an attack on innocent people in pursuit of their aims. They have deliberately struck at the heart of our nation. Lord Cledwyn of Penrhos, leader of the Opposition, said they joined in total condemnation of Friday's society a criminal attack those one other parties. An attempt to kill or

nembers of an elected government as a profound affront to everything this country believed in and

rained.
This wicked and grave act would have its repercussions. This was not the time to ask detailed questions, but could Lord Whitelaw clarify his statement that the security impli-cations would be explored to the

Students swing to the right

Reagan is new campus hero

From Bailey Morris Washington

This is a re-olutionary year on the American college campus. On the fifteenth anniversary of the birth of the "Woodstock generation", stu-dents are taking another sharp turn, this time to the right.

The counter-culture movement which spawned the activist Tom Hayden, the acid lyrics of Bob Dylan, and a generation of student liberals, is dead. President Reagan is the new campus hero.

Polls taken before the first televised presidential debate revealed surprisingly strong support for Mr Reagan among young Americans.

recent Washington Post-ABC Television poll shows Mr Reagan leading Mr Walter Mondale by 58 per cent to 38 per cent among under-25 voters. A Louis Harris survey gave Mr Reagan a 13-point lead among students aged 18 and 19. A Gallup poll concludes that with the Republican Party than at any time since the early

Ban on Latin Mass relaxed

Church perplexed by papal ruling

Vatican is what the Pope hopes to achieve by bringing back the Tridentine Latin Mass, believed to have been finally abolished for countries other

Monday night was a surprise. It came in the form of a letter to the 3,000 bishops around the world. The return to the old Mass i hedged by conditions five in all - yet perplexity over

Liturgical reform, including the introduction of the vernacu lar into the Mass, was a fundamental element in the work of the Second Vatican Council which approved its decree on the subject in 1963. It included other ways in which the Mass would be more easily understood by the faithful and their participation increased. For example, the priest faces the congregation instead of having his back to it. The innovations did not suit traditionalist thinking but were is keeping with the work of the council. After a period of experiment the new Mass was published by Paul VI in 1970.

The text was in Latin and was then translated into the vernacular throughout the Cath-

An inquiry by the Vatican in 1982 showed that the mass was accepted by almost everyone and 98 per cent were said to ists still favouring the Latin mass was small and said to be

diminishing. The most famous advocate is Mgr Marcel Lefebyre, the archbishop suspended by Paul VI. But he represents the extreme front and his objections in modera Catholicism do not stop at the ernacolar mass.

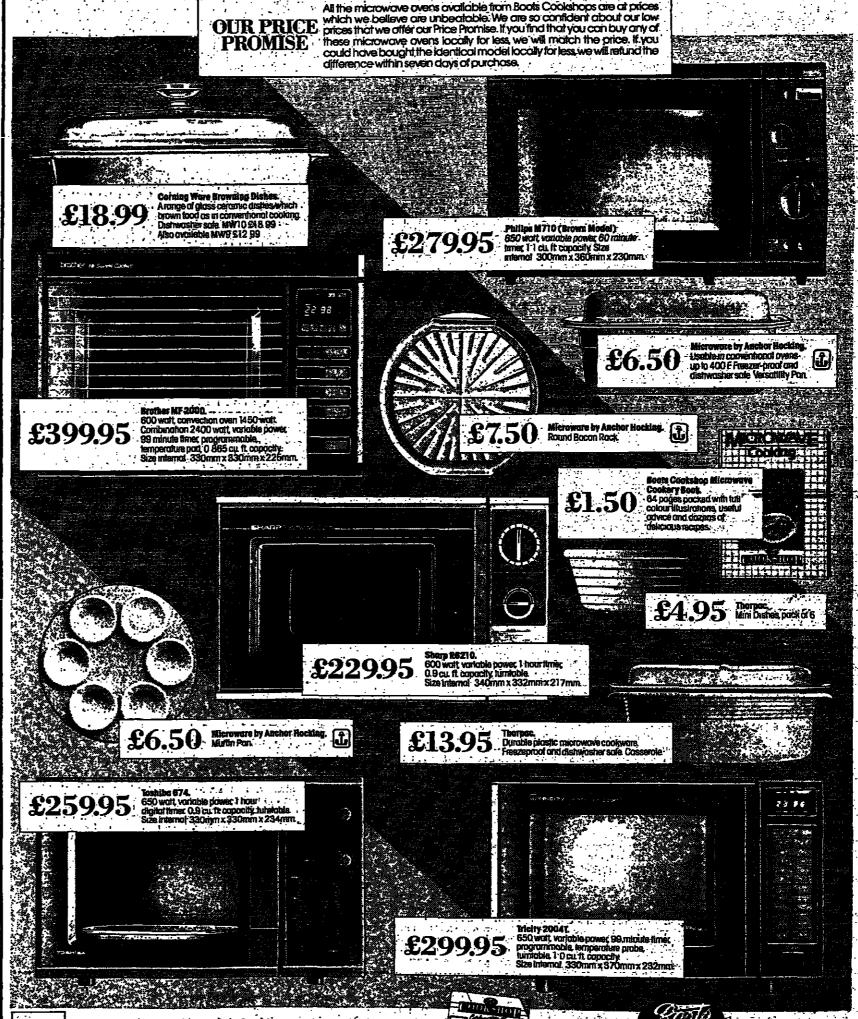

Whether as a gestare to traditionalists, or for other reasons, the Pope insisted that Catholics be allowed to hear

The conditions attached to its use are fairly formidable. Permission has to be chrained from the local bishop; it will not normally be celebrated in parish churches; bishops at the end of a year will have to report back on developments; and, most extraordinars, requests for the old Mass must be accompanied by an explicit statement of acceptance of the Vatican Council and the new

the mental acrobatics of asking the mental acrobatics of asking for something which the council rejected, while professing to believe in the council's work. The fear expressed here is that such a formula could be used to undo other council decisions. By an odd coincidence, the lefter was published on the day marking the sixth anniversary

asked". He would not say what

There is nevertheless, strong speculation that the three men will leave the consulate before next Monday. That is the date on which the trial is due to start in Britain of four South Africans and others accused of trying to smuggle embargoed

ms to this country. Last month, Mr R. F. Botha, the South African Foreign Minister, announced that the four men, who were released on bail earlier this year and are now in South Africa, would not be returned to Britain for trial reprisal for Britain's obstruction of South African law enforcement.

This decision to break a solemn promise to a British court has been widely candemned at home and advocab. Even right-wingers here have argued that South Africa should have closed the consulate rather than break its word. If the fugitives have left the consulate by the time the trial starts, it is iustification for reprisal will look even thinner.

On Monday night, Mr Ander son, garlanded with flowers, spoke at a public rally here attended by more than 7,000 people, predominantly Indians, to protest against the country's security laws, which permit indefinite detention without trial on unspecified charges.

World Food Bardot puts Day marked with figures on hunger

From Peter Nichols

President Pertini marked
World Food Day at the
headquarters of the United
Nations Food and Agricultural
Organisation with a sombre
speech on the "disquieting
questions" regarding the future
evolution of the world.

The head of the Italian state

The head of the Italian state reminded his audience which included representatives of the 156 countries accredited to the organisation, of the "alarming picture of old and new realities." Hunger, malnu-trition and disease were still widespread, while destruction of the environment was con-

of the environment was continuing inexorably.

More than 750 million humans lived below the threshold of poverty" Senor Pertini said and 55 Third World countries, with more than a billion inhabitants, were no longer able to feed themsives with traditional methods of production. nethods of production.

About two-thirds of these countries' livestock was lost because of disease and madstagnation in-food production per head in the Third World as a whole during the past 10 years and a decine in the lowest-income countries, with some 225 million people underfed in Africa alone.

At the beginning of this decade, President Pertini continued, World agricultural production declined and at the same time the unsold surplu in industrialized countries increased. Yet shortages, drought and fires were raging and the deserts were spreading in many specially in Africa.

The average life expectancyb in the industrialized world was 73 while in developing countries only 57. What he described as "the darkest spot in the picture" was that infant mortality stood today at about 43,000 children a day.

That the evils of mankind were still immense and greater than expected was a misfortune in itself. But what was even worse was that an accord to tackle them had yet to be

He attacked the arms race. We must realize that the arms race has generated and will generate not more security by more insecurity, and that the costs of accumulating destructive capacity will reach the skies and end up by destroying the dream of a better and serene life for all."

The main theme of the World Food Day was women in agriculture and President Pertini asserted that the "battle for mankind's destiny would not be won if, besides children, we did not pay attention to the partner of our life and the mother of our

Women had been neglected and suffered discrimination for centuries but today they were coming into their own after a long struggle. Woman is, and must be, man's partner and his equal, in forging the world's destiny," Signor Pertini said.

animals case to **Mitterrand**

Paris - Brigitte Bardot, the actress turned animal welfare campaigner, lunched with President Mitterrand yesterday at the Elysée Palace, Diana Geddes writes. It was the first time Miss Bardot had been received at the Elysée, and the first time a French President had received an animal welfare campaigner.

"It is a great day! It represents a victory for animals! Miss Bardot said afterwards. "We talked only about the protection of animals in France. and the President told me he would study the problem seriously and see what could be

demotion for the once powerful chief-of-staff and First Deputy

Mr Romanov, who controls defence industries in the secre

tariat and has strong military links, was said to have been

allied to Marshal Ogarkov in

taking an ultra-hard line on arms control. Their joint comeback, with Mr Romanov

moving to revive the "star

wars" talks, suggests the hardliners may now be trying to cut the ground from under the feet

of those more broadly identified

with détente and dialogue such

as Mr Gorbachov, a protegé of

President Andropov and the

of Russia's Western forces.

From Richard Owen

Analysing the mysterious processes of Soviet politics is often, as St Paul remarked of a higher mystery, like looking through a glass, darkly. With a week to go before the extraordinary Central Committee plenum, the rise to prominence of Mr Grigory Romanov and the unexpected reemergence of his ally, Marshal Ogarkov, have fuelled speculation about behind-the-scenes manoeuvring.

Mr Romanov, aged 51, made an offer of "honest dialogue" to the United States in an important speech in Helsinki reported in full in Pravda on Monday.

It was Mr Romanov's first public appearance since he Ethiopia a month ago, and there were suggestions that Mr Mikhail Gorbachov, aged 33. Mr Romanov's main rival for the leadership, might be manoeuvring to reduce Mr Romanov's influence. But in Helsinki, where he attended celebrations marking the end of the Winter War 40 years ago. Mr Romanov appeared assured and forceful.

As former party chief in Leningrad, Mr Remanov is well known in neighbouring Finland, where he has long been regarded as a hardliner. But this time, while blaming America for the breakdown of the Geneva arms talks. Mr Romanov urged dialogue with Washington "on the cardinal problems of our time".

"How many times have you been told by the Soviet Union's highest representatives that we are ready to negotiate at any time" he remarked after his cow's conditions were. "The most important thing is to prevent the militarization of

The Romanov line coincides with Mr Reagans' stated willingness to negotiate a moratorium on space weapons testing. Mr Romanov was also sufficiently leading contender to succeed

most powerful Politburo mem-ber after Mr Chernenko, with control of appointments and personnel, the economy and ideology. The extraordinary plenum, which has still not been officially announced, may indi-cate whether his position as Kremlin number two is under challenge.

Observers were intrigued last weekend when Mr Viktor Alanasyev, the editor of Pravda, retracted his reported reference to Mr Gorbachov as "our second General Secretary". During a meeting with Japanese journalists Mr Afanasyev had confirmed there would be a special plenum on agriculture and personnel matters this month before next month's regular session, and suggested Russia now had two leaders: Mr Chernenko and Mr Gorbachov.

Marshal Ogarkov's new post. Mr Romanov said he was now in command of the largest part In the Byzantine and strictly hicrarchical world of Soviet politics such a remark was bound to arouse antagonism This supports the theory advanced by Soviet sources last 10ward Mr Gorbachov and reinforce suspicion that the pro-Gorbachov faction would like fall that he had been transferred to command the Western theatre of war. Although only to hasten the departure of the ailing Mr Chernenko, aged 73. These reports could also be

part of a campaign to undermine the heir-apparent by suggesting that he is not only Defence Minister, the Western excessively ambitious at 53 but command is a senior appoint-ment and suggests Marshal Ogarkov still wields influence. also has alarmingly unorthodox ideas which might challenge the conservative-minded party

Dance: John Percival out of town

A production to give years of pleasure

The Sleeping Beauty

Hippodrome, Birmingham

Perhaps the most important thing about Sadler's Wells Royal Ballet's new production of The Sleeping Beauty, premiered at the handsomely refur-bished Birmingham Hippodrome, is that it has a strong and apt visual style which seizes the imagination as well as the eye. Philip Prowse's designs have a flair, consistency and authority that compete in the same league as Messel's 1946 Covent Garden version and Georgiadis's for Nureyev.

Prowse has chosen gold, shadowed with black, as his principal colour. It glows richly but sombrely in the great hall for Aurora's christening, takes a pale sunshine in the palace gardens for her doomed coming of age party, frames a formal landscape for the arrival of Florimund, and glitters with mirrors and bright lamps for their wedding celebrations. As soon as the curtain rose, Monday's opening night audience saw that West Midlands Council had something to be proud of for their sponsorship: a production that will last to give years of pleasure.

To praise the designer first is not meant to put down the work of Peter Wright as producer. But his chief contribution is, very properly, that of presenting Petipa's choreography, as preserved and handed down thanks to Ninette de Valois, to whom Wright dedicates this production. The great virtue of his staging is its ceremoniousness, the pomp and pride of the processional entries, the bold clarity of the story-telling. That - and, of course, the sense of style that he has instilled into his company's dancers.

He rightly keeps Ashton's solo for

Magical

fusion

Emil Gilels sets his own terms:

it is no use negotiating. Why

should a pianist who can eat Beethoven's "Hammer-

playing Scarlatti sonatas? One possible answer: to astound us

by forcing us to marvel at how

Aurora in the vision scene (but sadiy omits her bounding first entry in that act), and makes a homage to Ashton and Petipa in his partly new Act III pas de quatre to the "Jewels" music. His new solos for three men are fine (although Florimund's in the hunting scene seems out of mood), but Wright's new ensemble dances - the garland waltz and a wishy-washy arrangement for the panorama music - are poor stuff, conventional and dull.

The production's real test will come as successive casts take on the various roles; five Auroras and six Florimunds are announced for the opening tour, and the other roles will change almost as often. Chief honours at the première went to Roland Price, whose Florimund shows a splendid advance in his stature as a dancer for the big classic

It is unfortunate that for his first entrance he wears Prowse's one disaster among the costumes, a blue uniform that makes him look like a hussar from a not very good regiment. But Price's bearing and presence have a new maturity, his partnering has come on apace (although still not without its precarious moments) and his solos have a sweeping strength.

Marion Tait shows an attractive phrasing on her solos as Aurora, and dances with sunny warmth even if the role really needs prettier and stronger feet than nature gave her. A pity that she is obliged to wear dull, heavy shoes while all her followers shine in pink

Sandra Madgwick, as the Bluebird's enchanted princess, shone brightest among the classical dancers, and the opening cast had a notably gracious Lilac Fairy (a mimed role again in this version) and malevolently beautiful Carabosse in, respectively, Margaret Barbieri and Galina Samaova, both of them remembered gratefully as outstanding Auroras.

The general standard all through the evening showed that, although temporarily short of brilliant principal dancers, Sadler's Wells Royal Ballet is particularly strong at the moment in both established and up-and-coming soloists. All praise, besides, to Barry Wordsworth and his orchestra for a buoyant account of Tchaikovsky's score that gave an added éclat to the evening's success.

Cinderella

New Theatre, Hull

Peter Darrell's Cinderella for Scottish Ballet starts with the immense advantage of a score made to measure for him by Bramwell Tovey from music by Rossini. Besides five numbers from the obvious source, La Cenerentola, he found unfamiliar ballet music from early operas and adapted some fantastical piano pieces from the late years. This is not only most attractive in itself, but enables Darrell to tell the story much better than the Prokofiev score allows.

The chief gains are in making the

Prince a much more interesting character, who changes places with his equerry Dandini out of exasperation with court life, and in building up the love story. Giving the comic family their heads in Act I. Darrell keeps them firmly on the sidelines at the ball, concentrating on how the Prince falls for Cinderella because she has eyes only for him, in spite of the disguise that fools everyone else.

Darrell clinches his success by providing his leading couple with love duets that have a rare warmth and feeling, while also extending the dancers into a grander sweep of movement than any of our other choreographers since Ashton even attempt, let alone achieve.

Created in 1979, the production has come up sparkling fresh in the present revival, which is at Hull this week and Aberdeen from October 30. At the Theatre Royal, Bath, last week I saw the two newest of the alternating casts. Christine Camillo has a wonderfully assured style and confiding manner, Linda Packer is more wistful and marginally more expressive - but really both of them make Cinderella entirely captivating.
Vincent Hantam gets a lot of fun out

of the Prince's enuoi and puts a lot of feeling into his falling in love, besides dancing his solos with characteristic sparkle. Christopher Long tackies the role more conventionally, but with spirit, and partners Camillo ardently, at their performance Dandini emerged as a more vivid and comic character in the hands of Davide Bombana.

I thought the sharp, spiteful but very funny playing of Ruth Prior and Anna McCartney as the stepsisters has the edge on the preening snappiness that Judy Moheky and Sally Collard-Gentle gave them, but both pairs maintain the admirable ensemble playing that is one of Scottish Ballet's strengths. In spite of cutbacks (the Arts Council does not yet send its cash where its fine words are, in the regions), the company and its orchestra are in fine form. Any sponsor wanting a safe bet for next year's Edinburgh Festival would be wise to put his money now on Darrell's proposed Carmen ballet.

The Sound of Music. All we had was an 11-page outline script and 12 songs, but with those we went into rehearsal and on my twenty-seventh birthday I stood at the window of a skyscrape restaurant overlooking Broad way reading aloud over the phone to Schultz one of the Times ever gave a musical. Schultz said that was very nice,

Pan Am's New Clipper Class. The Million Dollar Experience.

One million dollars. That is how much we are spending on refurbishing each Pan Am 747.

Our objective was to make Pan Am Clipper® Class simply the best in the business.

To do this we set about totally redesigning it. In fact little of the old Clipper Class remains.

No longer is there, as with other airlines, one separate business cabin. The new Clipper Class has three. We thought that would give you more privacy.

Cat With The Old, In With The New.

Then we threw out the eight-across seating. Now it's just six across. And, unlike other major transatlantic carriers, they are individual seats purpose-built for business class.

Out too go the overhead bins. Now Superbin comes to the rescue of travellers with large hand luggage. Six times bigger, these new bins can take suitcases standing or garment bags laying flat.

The film went the same way. Out. But

movie buffs needn't worry, in its place is a brand new Sony video system.

However, Clipper doesn't just look better, it sounds better too, with the addition of new lightweight electronic headphones. So wherever you sit you'll have the best seat in the house.

A New Restaurant At 35,000 Ft.

When it's time for dining there's a whole new experience for you to enjoy. Separate courses served on real china. It's like stepping back in time to the gracious days of flying.

But the benefits of travelling Pan Am Clipper Class aren't all aboard the 747.

On arrival at the airport you go straight to your own separate check-in.

Speed Above The Traffic In A Free Pan Am Helicopter.

If you're going to New York there's a free helicopter from JFK to East 60th Street, Wall Street or Newark Airport. No other

airline has its own helicopter service.

Meeting our evening New York flight is a free limousine to chauffeur you into Manhattan.

Both of these services leave from the same terminal, the one that you arrive at, our very own Pan Am Worldport®

Be sure to book one of them when you make your reservation.

Europe And America Under One Roof.

From Worldport you can also catch Pan Am flights all over America. It is the only terminal to have both international and internal U.S. flights all under the one roof.

Next time you fly to the States, fly Pan Am. After all, who else offers you, for the price of a business class ticket, a million dollar experience?

For information and reservations call your Travel Agent or Pan Am directly on: London 01-409 0688; Prestel 215747.

Pan Am. You Can't Beat The Experience:

The marks saving Marx

a tramp who, having spent his nb in newsbabers in a Knights-

bridge doorway, enters Harrods for a claudestine wash and

Everything around him glitters or shimmers or smells of wealth. The salmon from Scotland, the cheeses, the sweetmeats are tangible, real, available but, for him, as

just tramps, but workers, academics, housewives, craftsmen - are condemned to similar lives. They commute between two parallel worlds, a world of scarcity, measured by the length of its queues and the breadth of its empty shelves, and a world of unlimited

In a country where it is technically impossible to buy a pair of shoes for a schoolchild, it is possible in practice not only to buy those simple shoes but also a silk shirt tailored by

The dollar and the Deutschmark, even sterling, are at the heart of this conundrum. The flow of these currencies the dollar, the constant shortthrough the veins and arteries of East European economies has in the short term at least, kept the consumer calm.

The grey, brown and black legal, semi-legal and outright absorb some of the western criminal activities - have actually acted as a stabilizing element in Eastern Europe, defusing the tensions that build up at a time of chronic shortage. But the huge, daily corruption that is eating into the socialist states, the creation of a gulf between those who have ready access to dollars and

those who do not, all of this stability of the bloc. Appetite for hard currency led them to set up networks of shops where only western cash is accepted. In Poland these are known as Pewex, in Czechoslovakia as Tuwex, in Bulgaria as

Intershop. Consider the Depending on season and the temperament of the plan, it is difficult or impossible to buy the following goods in Polish shops for Polish currency: flour, butter, rice, most cereals, most kinds of meat, washing powder, hair shampoo, children's shoes, light bulbs, lavatory paper, coffee, sugar, oranges, bananas, school exercise books, chocolates, dictionaries, car batter-

The list could cover a sense of wonder. complete page of The Times.
the frustration of Now pass the shops by and enter a Pewex. Gaudy signs advertise chocolate bars that "help you work, rest and play", cartons of Mariboro and Kent

cigarettes are piled up shouder-high, the shelves are cluttered with tins of ham, jars of chocolate spread and the amber parades of whisky bottles. Outside children push their

noses against the smoked glass looking into the wonderland. In the Eastern bloc it is illegal to sell or buy western currency but it is not illegal to possess it

Nobody in the shops asks where the money has come from. Theoretically it could have been sent through the post by a benevolent relative, or it could have been earned in legitimate work abroad. But most of the cash comes from the black market which flourishes and expands in a way that the official economies of Comecon have failed to do.

According to semi-official estimates between 50 and 70 per cent of expenditure in Poland is channelled into the second, black, economy. It is a market that thrives on the demand for ages in the official shops, the poor quality of domestic products and official prices that are kept artificially low.
But the problem is that while

these shops were set up to currency that was already circulating and make some profit for the state (most hard currency stores make about \$200m a year for their governments), the effect has been to make the dollar and the Deutschmark a central part of everyday survival.

A plumber in East Germany will come to your assistance for

10 West German marks but not interests are challenged by such for double that amount in East far-reaching changes. There are German currency.

in Poland a dollar bribe to a speedier repair work - it also reduces the likelihood that he will swap your perfectly functioning car battery with a defective one.

In Romania, a carton of Kent rigarettes, the safer form of currency, will guarantee the

But the social divisions that are opening up as a result of this parallel existence are slowly being recognized.

A Czech commentator said on Bratislava Radio: "It is not easy to fight bribery because it often helps us to achieve something we want very much, and even the most principled of us will bend our principles.

"Usually two are involved, he who bribes and he who is bribed. But who will bribe a miner? A steel foundryman? A woman working in a textile mill? A milkmaid or other honest working people?"

Who indeed? It was inevi-table that the Solidarity revolution was sparked off by Gdansk shipyard workers. Nobody bribes such workers. though they may have put in long years of apprenticeship. Nor do they have access to hard currency except by finding an illegal dealer and cashing in a substantial slice of their wage

They are urged to work harder but the incentive to do so is a small increase in their zloty wage that can buy next to nothing in the official shops. "The problem", a Hungarian

sociologist comments, "is that black markets have become a substitute for reform. The idea of reform in most East European countries is to introduce afterwards. more market mechanisms into everyday life.
"But too many entrenched

too many bureaucrats with desks to lose. The result is that car mechanic not only ensures the underground markets - the grey, the brown and the black take over the market mechanism, try to match supply with demand by dealing in dollar denominations or large, 're-alistic', quantities of local

> Hungary which has managed to push its economic reforms the furthest, the key symptoms being relatively full shops but high prices, is also the least troubled by a dollar black

> The usual chain of bribes can be found when, for example, an individual tries to build a house. but western currency does not play a central role.

Grey markets usually offer legally acquired goods or services in an illegal way. At its most harmless, the grey market is best observed in the early evening when old ladies appear in the streets of Warsaw, Cracow, East Berlin and Prague to sell flowers to those who are invited to dinner.

The flowers are being sold. after official closing hours by people who do not have official trading licences at uncontrolled tolerated by police in all these countries

involve the sale of services. A state-run hospital who offers to carry out an abortion after hours is a common example in every Eastern bloc country.

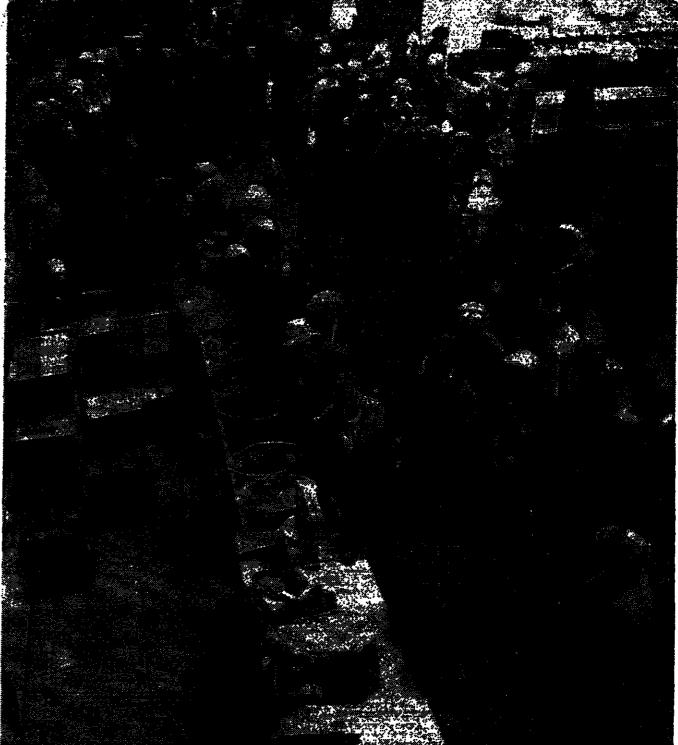

Abortion is legal throughout Eastern Europe but it is often a faceless, harsh process. Rarely is an anaesthetic offered and the patient is frequently expected to take the bus home straight

A state doctor with a private practice on the side can offer more personal treatment - for a hefty fee in local or hard

The colours grow darker as the scope for corruption increases. The brown market includes sales clerks who hide a new intake of linen or meat or books when it arrives and then telephone regular clients, in return for a bribe.

The Berlin-Warsaw express is a brown market on wheels. Poles who work in East Poles who work in Germany come back to the motherland at the w with suitcases full not of dirty washing but of chocolate or coffee for resale to dealers.

As soon as the train crosse the East German-Polish border dealers put their heads into compartments in mute inquiry. By the time the first Polish stop

Poles queue in front of a department store where they hope to buy sweets and chocolates for Christmas

has been carried out, usually in the lavatory - two months chocolate which will end up at five times the price in private Polish shops.

This is a brown market because the chocolate has been legally acquired and because the illegality of a bag full of sweets is difficult to prove.

The full-blown black market includes those who deal with stolen goods, the wholesale profiteers who buy goods diverted from official shops, the

speculators, the prostitutes and the underground entrepreneurs. Most professional black

marketeers live in their own special milieux - in Warsaw it is the Praga district - and haunt specific cafes. They have an independent information ex-change and know which policemen are bent or bendable.

in East Berlin the marketeers have contacts with third world diplomats who can travel without impediment through the wall into West Berlin and return stocked to the gunwales

In Bulgaria two or three big gangs have sewn up the seaside resorts and both Burgas and Varna are key black market

Not just Solidarity but also hardline Marxists sense that there is something gravely wrong with a socialist state that not only allows but also contributes to the prosperity of these dealers.

But they make the error of pursuing private businessmen. many of whom operate well within the law, on the assumption that private enterprise equals corruption. Slowly, the

Do you have a clearer idea of what Dr Barnardo's was doing last century than what it was doing last week?

Many people's image of Dr Barnardo's is rooted in the past and, not surprisingly, their picture of what it is doing today is pretty hazy.

Rest assured it has moved to meet contemporary needs without losing its firm sense of purpose.

Dr Barnardo's is helping thousands of mentally, physically, or emotionally handicapped children and young people who need all the help they can get.

Primarily based in areas of highest deprivation, Dr Barnardo's has some 140 'projects' which bring hope and help to children in need and their families. That number will soon rise to 200 as Barnardo's professional staff and trained volunteers expand services to the handicapped and press home the attack on the ills of our society.

One other thing Barnardo's has kept — its efficiency. Only 3p in every donated pound goes to Head Office administration. Dr Barnardo's receives a proportion of its income from central government and local authorities, but, above all, relies on voluntary contributions to help each child reach his or her fullest God-given potential.

We cared then—we care now Barnardo's If you want to help or learn more about Dr Barnardo's please send an s.a.e. to: Dr Barnardo's, Tanners Lane, Barkingside, Ilford, Essex IG6 IQG or ring 01-550 8822.

"No one dares speak up for the Afrikaner. We are asking the South Africans to do what we would not even contemplate given the same difficulties. And it is the Afrikaner who must carry the burden while the English population here in South Africa does nothing but mumble vaguelly liberal senti-

Celtic passion is alive and well and living on the shores of a South African lagoon. At Knysna, a stone's throw from where the white man first set foot on Southern Africa, Kenfoot on Southern Africa, Kenneth Griffith is preparing to lay bare yet another infamous chapter in the Mistory of the British empire. He will film the life of Paul Kruger and the events which culminated in the Boer War.

We are seated in the study of

a rambling colonial bungalow, a room crammed with books and documents, research material for Griffith's next nine commissioned films. At 62 he has built up a considerable reputation as a radical film-maker of a series of highly subjective drama-documentaries which have enthralled his audience and invoked the wrath of the

He is quick to deny that he ever deliberately sets out to be controversial. "I do believe I have a strong feeling for human justice and anything I do is actuated by that feeling.

"I have a compulsion to jump to the defence of a nationor a person who is being cast in the role of villain, because you so often find they are no more villainous than the rest of us. What touches me off is a feeling that an attitude is unfair. I've long admired Kruger - more than any other human being he dictated the quality of life on this subcontinent.

"One of the main aims in Afrikaner point of view be seen overseas. I'm appalled at the noses, they don't even begin to to consider the awful consequences of the course of action hey believe to be right. I have would love to ask Mrs Helen Suzman exactly what she and her political party are advocating.

"If there was one person, or vote, would she disagree that within a decade - after all the blood had been shed - that the limited democracy that exists. here would promptly end? That south of the Limpopo river what you would have would be Why Kenneth Griffith is making a film sympathetic to Afrikaner history

A British rebel defends the Boers

from by own head. "I was a sadical socialist. I'm now a radical Tory - it has been a very painful journey.

"A lot of people will be upset

by what I have to say in the Kruger film. It will tell what South Africa is about. In 1836 they left the land of their birth in the Cape and made their incredible trek, northwards to escape the yoke of government from Whitehall. They thought they had succeeded when they signed the Sand River Convention in which Britain guaran-teed them the right to manage their own affairs.

"It is one of the greatest tragedies that Britain was unable to keep to this promise. Then there occurred the two biggest disasters in Afrikaner history - the discovery of gold and diamonds on their territory. The first gave the English an unhealthy interest in the Rand and the second opened the floodgates until they were engulfed in a sea of human

greed. War was the result.

"A friend of mine, a radical Jewish journalist here in South Africa recently had a grave warning for me. 'Don't make the Kruger film, don't be an apologist for the Afrikaner, it will finish you in Europe.' I'm willing to take my chances."

How the British sank their first Cognac Courvoisier

favourite of the British.

As far bank as 1780.

Dr Samuel Johnson made the following observation.

Claret is for boys, port is for men. But cognac is a drink for heroes.

Be that as it may coguac was certainly a favourite of one hero of the time.

Napoleon Bonaparte

Courvoisier is the only cognac to be honoured with The Diploma Prestige de la France, the French award for excellence.

only outweighed by his distince of the British. So the chances of the British getting their hands on the Emperor's favourite cognac, were somewhat slim.

Circumstances changed that.

In 1815, after his abdication,
Napoleon arranged to leave secretly for the United States of America.

He loaded two ships with a variety of provisions, including cognac supplied by Emmanuel Courvoisier.

In 1860, Felix Courvolsier was appointed official purveyor of cognacs to the Court of Napoleon III.

Napoleon subsequently changed his mind and decided to give

> the parents perhaps have medical insurance? Research by the University of Minnesota into that State's blossoming ad-psych and CD provision found a large pro-

no signs of mental illness.
When you make a visit, you find one or two kids who have very serious mental health problems or serious histories of drug or alcohol abuse. The rest range from kids who are runaways and truants to those who are basically a nuisance and a pain in the neck. And they tend to be white. The black and hispanic kids have parents who can't afford insurance, so remarkably they don't have the psychiatric problems and they. show up in detention centres."

This academic assessment is echoed in that of Shawn, a former patient at Minnesota's biggest psychiatric hospital, who claims that his threemonth stay was marked by constant trouble, during which he was given several shots of a major tranquiliser, and at one point was strapped to a bare bed in a locked "Quiet Room" for 121/2 hours. Of his fellow patients, this 15-year-old formed the view that most did not need treatment: "There were two girls in there for prostitution. Most of the kids were in there for using drugs and having problems at home or at school, I aw only one dude who was a fruitcake

"It's supposed to be a fruitcake ward, but the other kids were just like me, rebelling against whatever they were rebelling against. This teenager was candid about his own rebellion. It had taken him through a cocktail of narcotics and two petty thefts in the street, but to the untrained eye he showed no symptons of mental illness.

The patients' rights advocates in the local Mental Health Association too have found demand for their services increasingly bouyant. One said that after a recent success in having an unconsenting teenage patient discharged, he was distressed to find that she had been so heavily tranquillised that she was unable to walk and matter of financial coverage. Do had to be taken drooling in a wheelchair to a car. Anxious about withdrawal symptoms, he arranged for an independent psychiatrist to monitor her, but after four days the psychiatrist she was not mentally ill.

"It makes you wonder wha the problem was in the first place", says the advocate, "She certainly made a spontaneous recovery - and the only other time I've seen that happen is when the insurance is about to run out."

Across the United States. there is no indication that the insurance is about to run out. The ad-psych business it has financed seems to have hit a bonanza, Now in British, 100. signs are visible of a commercial link between private psychiatric hospitals for adocents and medical insurance companies which cover their families.

There are differences, of course, most notably that almost all psychiatric medicine comes under the NHS. And the longest stays would be cut out by the medical insurance companies limit for payment. I have heard no suggestion.

that children are currently being given psychiatric treatment in hospital in Britain who don't need it, nor that they are being held longer than necessary, but the similarities between Britain today and the United States ten years ago are close, and perhaps too close for comfort in the approaches of government and

British children under 16have no protection against their parents' decision to put them in psychiatric treatment. If they were in the care of a local authority, a magistrates order would be required before they could be locked in "secure" accommodation, but no such hearing is demanded by law if they have been volunteered as patients by their parents. They have no more right to due process than American children

Under a government which is unlikely to resist any growth in private medicine, our resem blance is so close to the United States when its own boom was just beginning that from the University of Minnesota's study team comes a warning - the warning of those who have seen

TALKBACK

Middle age misunderstood

From: Yvonne Roberts, 57 Hambalt Road, London SW4. Bryan Appleyard (Moans of the Middle-Aged Male, October 10) innst have been so handicapped with his own preoccupations (onset of middle age?) that he (onset of middle age?) that he paid scant regard to the one of the day of publication is like introduction to my book Man total Enough hence his

misunderstanding of its aims. Mr Appleyard believes I Rewards abroad interviewed 22 men to reinforce magnifine stereotypes. regarded the men as "pointless it they failed to fit a "category" and I have a "world view" male attitudes. All of which I

allegedly accomplished through the "distorting lens" of "feminism", "soft leftishness" and "the ideology of sex" (whatever that might be). Not only is this pretentions waffle: it is untrue. I wrote the book precisely

because I was tired of the stereotypes. Far from subduing variety in the opposite sex as Mr Appleyard claims, I was seeking to find it.
The book has no "categories"

nor, indeed, any comments about individual men. The 22 spoke for themselves. In short, I listened to a small group of men at length, not to judge them but to understand better their views. Has Mr Appleyard read the

He writes that he feels Haven in the East nothing but "dim horror" for the 22, whom he refers to as my "victims". I fear the only victims are the four who have fallen prey to Mr Appleyard. He unfairly used very short extracts from their interviews, which made them appear selfcentred and ridiculous.

According to Mr Appleyard's world view" theory, I should see his rather cruel selectivity as an example of man's sterotypical inhumanity to man. I do not. I regard it only as evidence that he began with a moddled thesis and tried to tailor the material in my book to suit it. I'm sure be will be man enough to concede that he has failed.

News that keeps

From: Margaret G. Powling, 9 Peters Crescent, Marldon, Pale nton, Devon.

I too, am in favour of 22 throwaway life style (The Monday Page, September 26), But how about a "not read until..." date on all news papers? I find much to interest me when they are (at the very least) one day old, and they improve beyond measure during wipened fruit - too raw for

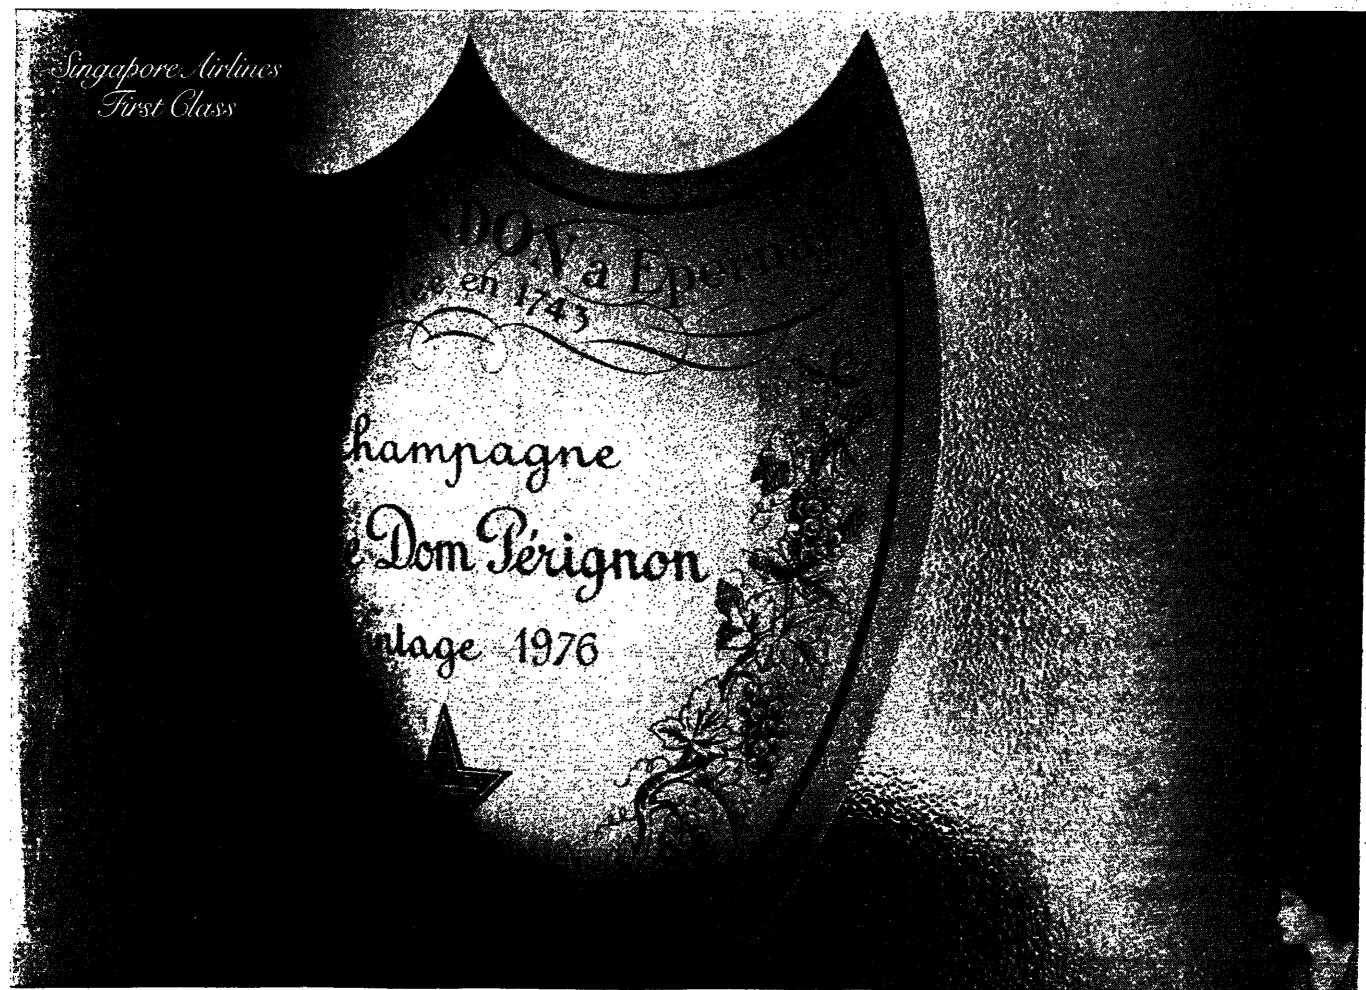

From: Barbara Anne Freema 11 Deepdale, London SW10. I read with interest the article Life As An Englishman Abroad (The Monday page, October 1) South-East Asia as a journalist, and later as a wife and mother The writer omits to mention the rewards of expatriate life, which are (osually) greatly increased salary, free housing, willing and affordable domestic help, and

when people fail to adapt it is often because (a) they had problems before they left, (b) they didn't wast to change their way of life, (c) husband and wife never did communicate very

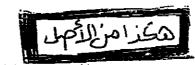

I'm sorry to say that in that part of "abroad" which I am familiar with, we British are not infrequently known as moaners and misers (holding tight to all

From: E. A. S. Lidderdale. 15 Wallgrave Road, London

Your intriguing article about marriage to Japanese (October 3) appears to consider it natural that the foreign wife should want to retain her previous Western life-style. But it should not be overlooked that there are many cases in which the foreign wife, by making the effort to enter totally into the Japanese life-style, has discovered a level of security and belonging that she had not experienced in her own country. The highly structured nature of Japanese society need not necessarily be a barrier, but can so prove a positive attraction.

Bernadette Scanlon, adopted at three months in 1954, describes her extraordinary quest

The day I found my mother

Always I had fondly imag-ined my natural mother to be just like me, but did she have to

up for adoption, aged three immediate bond between us. months in 1954 voice close by. There was no saw a pain and fear so acute that mistaking it, it was the same it made me feel like a Judas. If I voice which, two days earlier, had said into the telephone

"Well. you've found your mother then. Bernadette." It was her husband, Dan. He folded his arms around me and I responded uncertainly. He had learned only a few days previously that his wife had had a baby girl adopted six years before they had married. He lifted by luggage and we set off to meet my mother, Moira.

He was savouring the moment she was clearly postponing it and I too was gripped by a sudden impulse to run but the desire to see it through now that I'd come this

far was overriding.
I noticed a small, stunningly dark-haired women throw a r half-smoked eigarette to the ground and approach. There was no sudden surge of cmotion, instead she stretched her arms out awkwardly and I turned my cheek to receive her

> It was not a spontaneous gesture, it was one Moira had! rehearsed over and over in those fretful moments while she waited for her past to catch up with her.

For a few seconds I may have held her hands, I don't recall exactly. Everything around us --- seemed to come to a halt, the moment had a curiously eth-ereal feel to it. My eyes scanned her face rather as you might search urgently for the hallmark if you'd just uncovered a haul of bullion. But there was no

immediate recognition.
Her hair was black, streaked slightly now with grey whereas mine is audura, her nose was.

len lei?

She was late. Not very, but it straighter, her mouth wider, her had been half an hour since my flight arrived at Belfast Airport, somehow they seemed much

be unpunctual as well? it a thought And yet now we Especially on this, our first were standing face to face, there meeting since she had given me was something intangible, an

It was hard to look her in the Suddenly I heard a man's eye, however. Whenever I did I had come here to be mothered I now, instead, found myself feeling maternal and protective.

My childhood had, so far as I recall, been happy. Both myself and my adopted sister, who ironically had been called Moira, had always known we were adopted. Indeed, our adoptive parents made a virtue of it. We were special, they told us, because they had really wanted us.

From the age of about 21 I knew I would some day find out more about my natural mother.
But 1 didn't get round to
doing anything about it until I
was 29. One day, on impulse, I

rang The Crusade of Rescue and Homes for Destitute Catholic Children. Yes, they had a file on me, but first I would have to get my original birth certificate from St Catherine's House. It would be under my mother's maiden name. I found it - Bernadette Riley, born of Moira Riley, March 9, 1954.

The meeting with the social worker was depressing. Details were sketchy, caution and patience were advised. "You have to accept that she may not

want to see you. She produced a photocopy of the form my mother had signed to release me for adoption. It had her name, place of birth, County Cork in Ireland. She had been 21, alone and pregnant in London. She was giving me up, she said, "so that she can have a good Catholic home which I am unable to

From that moment I knew that seeing her would not be nough, deep down I knew I ved her already.

Some months passed before I decided to take a gamble and write to the parish priest in her birthplace in County Cork. I told him the whole story and asked him to look through the register of births to find a Moira Riley born in 1934-35.

A week of anxiously waiting for the morning post or a telephone call passed before his letter arrived on July 22. Yes, a relative of Moira's knew of my existence. My mother was married and living in Northern Ireland. Her address was there too. My God, I had passed within a few miles of it on a recent journalistic assignment.

One of her brothers, Paul, was a priest working in Suffolk. He seemed like the best line of approach. We agreed to meet.

As you might expect, it was slightly awkward. He clearly wasn't convinced that I ought to contact her, he was worried about the effect it would have on her - and Dan. He told me I had six brothers and sisters and

I ordered a double gin! He must have felt it was an awesome responsibility but he agreed to make the approach for me when Moira came to

England in October. "Is there any doubt?" I asked.
"Goodness, no," he said, "you

look just like her. Don't worry,

I'll be in touch," I went home, bored all my friends, day-dreamed and read everything I could about Ireland. I resisted the temptation to do anything without Paul. I was doing very well, in fact, when one morning the phone rang and an Irish man's voice said: "Is that Bernadette?"

"Well you've found your mother then ..."
"Who is this?"

This is her husband, Dan." My heart missed a beat: "How do you know about it?"
"Relations of hers in Cork." But I've tried to do it all so discreetly, no one is supposed to

know yet. "Well now, Bernadette. I've been married 22 years and I didn't know anything about you. Your mother's damned near having a nervous break-

Suddenly the enormity of what was happening hit me - 1 feared I'd blown it. Then his voice cracked and softened. He told me I had six brothers and

"Anyway", he said, "I bet you're really beautiful." "How romantically Irish".

"And do you have brown 'Yes'

"Well I'll be ringing you later. You know in all my married life there's never been a dull moment with Moira."

For the next few hours I sat in a total daze. Was this real or was it Hollywood? When the phone rang again I already knew it would be Moira.

Her voice was deep and warm and hesitant. We stumbled to make conversation, neither knowing quite what to say but not wanting to put the phone down. Eventually she said: "Well, do you blame me for having you adopted?" I assured her I didn't but she didn't sound convinced and went on to tell me how she'd had no choice, she was young, naive, alone, penniless and pregnant in London. Things

were different in 1954. Then she said: "Anyway, love, now that I've spoken to you I don't think I could resist meeting you, just to have a look. What do you think?"

Was she that unsure? Did she really think that if I'd gone to the trouble of tracing her that I wouldn't want to see her?

A couple of hours later Dan

bags packed to come over on suspected something. "Up until Thursday?" Rationally, I felt it unwise. Emotionally I couldn't about 12 years she would cry herself to sleep sometimes muttering: I want my baby. help but go. And so it was we met in Belfast, and in the early

evening we arrived in Donegal. One brother was in the house at the time. He hid away for a day or so but the following evening took me dancing. His tongue loosened by several pints, he said suddenly: "I'd just love to go out in the street and shout to everybody: 'This is my went to catch my flight.

sister!' I love you. Ironically the only person with whom I was experiencing any difficulty was Moira. All my life I had imagined she would have thought of me on March 9 but she couldn't even remember the date. It hurt like hell. I reminded her and she said vaguely, "Oh yes, it was

Suddenly I began crying. I told her she owed it to me to explain. I deliberately painted a picture of a less than happy childhood. I was shocked to find myself playing so cruelly on her guilt but I couldn't seem to help it. She remained outwardly unmoved.

"Well, you can't help *liking* her," I overheard her saying one night to Dan. So, she didn't love me, perhaps she didn't even want me here, perhaps she'd only told Dan about me because doorstep anyway. I began to plan a moonlight flit to Belfast

Each night she'd come into my room to kiss me goodnight. On night she said: "I don't suppose you could ever love me the way the others do." I said "We'll see," but I wish now I'd told the truth and said: "More". Then she heard that her other

children were coming home and that they were delighted that they had an older sister. Suddenly she changed. She had desperately wanted to keep me, she said, but she knew she

couldn't give me any kind of life and had been persuaded that my chances would have been better if I were adopted. In painful detail she recalled going into the home run by the

adoption agency, of taking me out for daily walks, of nursing me for three months before the fateful day.

How wrong I was to think that she could have done it lightly. She felt guilty, though she had no reason and had lived with that guilt since she was 21. Her husband later confided rang again: "Can you get your to me that he had often

Now the real upper crust

Short and sweet. The whole point of pâte sablée is that it should be as crisp as a biscuit and so decisively sweetened that it would be unthinkable to marry it with tuna or tomatoes.

It is a crust French pastry cooks use with finesse, rolled thinly for dainty lemon tarts iced primrose yellow with the sheen of glace kid. A little thicker, or maybe not, it is pate sablee that transports summer berries, redcurrants, straw-berries, raspberries and blueblack mountain myrtles, from plate to palate.

The practical virtues of this

rich sweet pastry are numerous, With a processor it can be made, rolled and baked without a pause, putting smart tarts on the dinner table after a day spent anywhere but in the kitchen. The dough can be stored for a week or more in the fridge, frozen raw or baked, and once cooked and ready to fill, the pastry keeps well for weeks

in an airtight tin.

It is stick and patch pastry, which is just as well because although small pieces are not difficult to handle, it is almost impossible to lift a large piece without tearing it, even using a rolling pin to support it. Happily this does not matter. Press splits together and mend the holes with trimmings and if you are neat, the repairs will be tricky to spot.

If you are unsure how much pastry you will need, never hesitate to err on the side of making too much. The leftovers or trimmings, re-rolled into a cylinder, chilled and sliced thinly or thickly on to a baking sheet, make moreish biscuits to

serve with creams or ices. was a wonderfully emotional, Larger circles of thin, crisp pastry, say 7 to 10 centimetres boozy night. She had under-estimated how important she (three to four inches) across, was to them. That night was the show off matching or contrast-ing layers of fruit. Dust the tops first time she said to me: "I love you." She meant it, it was all with icing sugar and serve them with a fresh fruit puree, or thin cream. or a chilled vanilla too obvious again when she crumpled at the airport as I custard sauce. Since then I have experienced

Small tart tins with flat loose bases and a diameter of about 10 centimetres (four inches) are ideal for making individual tarts to serve as puddings. Alternatively, a shallow 20 centimetre (eight inch) tin will give about six servings. The illing of these lemon tarts is as fresh and lemony as lemon

Lemon tarts Makes 6 small or 1 large For the pastry

140g (5oz) plain flour discover the name under which 55g (2oz) icing sugar A plnch of salt 110g (4oz) butter 1 egg yolk

> A few drops of vanilla essence For the filling Finely grated rind and juice of 2

3 large eggs

Shona Crawford Poole

170g (60oz) castor sugar 150ml (¼ pint) double cream

Icing sugar to dust

Sift the flour, icing sugar and salt into the processor bowl and add the butter cut in large dice. Process to the texture of fine breadcrumbs, stop, add the egg yolk mixed with a little vanilla essence. Process until the dough forms in a ball round the blade. Use the pastry at once or chill it

before rolling. The important point is to work the dough as little as possible. This is why the recipe does not specify chilled butter. as for shortcrust, which would involve more handling and produce a less friable result.

room temperature and worked stacks high between circles of with the fingertips until soft, crisply baked sweet pastry. worked into it, followed by the and taste good, too, stiting in a egg, and lastly the flour and pool of deep purple blackberry essence. Made in this way the pastry will need to be chilled for berries for the purce are heated several hours.

THE TIMES **DIARY**

Not standing together

In a stand of solidarity with the government against the IRA, it seems possible that neither Labour seems possible that neither Labour nor the Liberals will contest the forthcoming by-election at Enfield. Southgate, whose Tory MP, Sir Anthony Berry, was killed in last week's Brighton bombing. At the general election Sir Anthony had 26,451 votes, the Liberal 10,652 and Labour 8,132. On Monday, the local Liberal association held a prelimi-nary meeting at which support for the idea of not contesting the seat was expressed. The local Labour party, which has forthrightly condemned the IRA's action, meets tonight but will postpone debate on such a proposal. A Tory candidate has yet to be chosen. There is no precedent to guide local parties. The last MP killed by political assassins was Airey Neave, blown up by a bomb attached to his car by the Irish National Liberation Army in March, 1979. As a general election was held two months later, there was no by-

'How old's your paper?'

Kind words

Paul McCartney says his family aren't all thick. "I've got a cousin who compiles crosswords for The Times and Daily Telegraph and sets some of the questions for University Challenge," he says in this week's Time Out, declining to name the mystery man. Yesterday we tracked him down: he's a 58-year-old former Merseyside insurance broker by the name of Bert. (No relation, he assures me, to his namesake in the musical John. Paul. George, Ringo and Bert. Who dreams up about 15 crosswords a day, tells me he was very taken by his cousin Paul's remark on last week's South Rank Show - "Where there's a whim there's a way" "Mmm. Could be a clue there," he mused.

Christopher Thomas looks through the files of a Caribbean fiasco

Grenada: dossier of a dictatorship

St George's, Grenada As the trial of the Grenadan insurrectionists was due to begin yesterday, a team of American researchers were continuing to work their way through a mountain of paperwork which survived Maurice Bishop's 55-month Marxist dictatorship and the brief reign last October of the former colleagues who replaced him, only to be overthrown in turn by a task force of American

The documents provide a vivid account of the birth, life and death of the only communist regime imposed in an English-language country. They portray a bedraggled. bickering group trying desperately to be accepted as a serious part of the Soviet bloc, with a deep commitment to international revolution, And whatever apologists for Bishop may claim, they contain no evidence that his brand of communism was any softer than that which the "hardliners" now on trial - chief among them Bernard Coard, the deputy prime minister - would have

Those, in Washington and elsewhere, who saw Grenada being groomed for an insurrectionary role will find supporting evidence in the treaties of cooperation with the Soviet Union and other East Bloc countries. North Korea, North Vietnam and. above all. Cuba.

Throughout Bishop's reign - until he was ousted and killed, with three of his colleagues on October 19. 1983 - Fidel Castro was his guide, mentor and unswerving supporter, even when this meant disagreement with Moscow over the pace of turning Grenada into a total communist state.

An agreement headed "top secret" of July 1980, soon after Bishop came to power, provided for the supply by Russia of 50 armoured personnel carriers, 100,500 standard rifle cartridges, 37,000 cartridges with

of an idealistic tendency who argue

that a crisis, emergency or disaster

always brings out the best in people

and those, more cynical, who insist

that it brings out the worst, are both

wrong: extremely unusual happen-

ings, as far as my observation goes, tend to bring out only the most. That

is, everyone behaves in character

(though sometimes in a character

not normally visible), but in the

most extreme form of it.

Take the Prime Minister's con-

duct in Brighton. Anyone who has

even the slightest understanding of

her would have been able to predict,

with the utmost exactitude, what

would be the first thing she would

do after escaping death from a bomb

by two minutes and/or three feet;

she would make sure that her hair

was tidy. Where she is concerned, the cliche "not a hair out of place"

sheds its banality and comes to life;

it is even possible to analyse in

detail the instinct that led her to

make sure that her coiffure was

which for all she knew was about to

To start with, as indeed

demonstrated by the very first words

she spoke in public after the

explosion ("Business as usual"). Mrs

Thatcher's whole personality is

suffused with her belief that events

are inferior to people, she tidied her

hair before emerging because she would have tidied her hair before

emerging in normal circumstances.

and to omit the automatic adjust-

ment, merely because she had just

narrowly survived an attempt to

murder her, would have been to

allow herself to be dominated by

something impersonal and outside

In the second place, her pro-

fessionalism, which is more com-

plete and more deeply grounded than in any other public figure of the

day (perhaps of any day), told her

that the public would expect her to

show visual as well as verbal defiance, that to accede to that

expectation would be the best way to

serve her cause, and that an

instinctive and symbolic but very

visible sign of her acknowledgement

of those truths would be the gesture

of smoothing her hair. I swear that if the ceiling of the room had fallen on

her, covering her in plaster, she would have changed her clothes before emerging as well. In the third place, she is an

her own will.

collapse on her, coiffure and all.

November 6, 1983: Bernard Coard, alleged leader of the anti-Bishop coup, is flushed out by Caribbean troops in the invasion force

Bernard Levin: the way we live now

armour-piercing incendiary bullets; 30 76mm guns and 30 anti-tank guns. The total value was put at 10 million roubles, but Grenada would get them free. Delivery was to be via

In a letter to Marshal Ustinov, the Soviet Defence Minster, in February 1982. Bishop asked for military training for 20 junior officers under an agreement signed in Cuba 15 months earlier.

Under other agreements, the

Cuban communist party promised to send advisers to organize public meetings and party propaganda and also to help gather intelligence in the churches, although Grenada's churches are generally not politically active. In a recommendation, submitted on October 14, 1982. Cuba said contacts should be promoted among clergymen and members of the latty from Nicaragua and other Latin American circles linked to the theology of liberation "and, in general, to the idea of a church committed to revolutionary positions.

extremely feminine woman; you do

not need to know much about

women in general, let alone this

particular one, to know the role that

clean and tidy hair plays in that sex as a strengthening of femininity, a

raiser of morale and an assurance

From the moment she arrived at

the police station, of course, the

conscious mind took over, and from

then on - in her statement, her

demeanour and her speech – she was

it had been through the wringer

that all is well within.

was what she is.

On October 15 last year, three days after Bishop was placed under house arrest. Castro wrote a letter of haughty indignation to his "esteemed comrades" in Grenada about the chaotic tide of events.

Denying that Bishop had sought his sympathy. Castro said: "The

supposed notion that on passing through our country Bishop had informed me of the problems inside the party is a miserable piece of slander... we are indignant at the very thought that some of you would have considered us capable of meddling in any way in the internal questions of your party. We are people of principle, not vulgar schemers or adventurers.

"Everything which happened was for us a surprise and disagreeable. In our country the Grenadan revolution and Comrade Bishop as its central figure were the objects of great sympathies and respect. Even explaining the event to our people will not be east"

The documents contain evidence that torture was practised by

was allergic to anything. "Yes.

There was also Sir Keith Joseph,

whose contribution was to sleep

right through the bomb and its

sequel, then, when awoken and informed that there had been an

untoward incident, to don an elegant

silk dressing-gown (from Sulka, by

the look of it), and to remember (the

only minister who did, apparently)

to take his dispatch-box with him;

the combination of unworldliness.

meticulousness and adherence to

rules was exactly what would have been expected of him, just as Lord

Gowrie's first action on emerging

from the hotel into a crowd of shell-

shocked refugees was typical of him;

he ran down to the beach and

brought up three dozen deck-chairs

for them to sit on. And far away

from Brighton, Mr Dafydd Thomas,

the Welsh Nationalist MP, sank to

the occasion: the man who spoke at

a meeting to commemorate Bobby

Sands was asked to comment on the

Brighton bomb, and replied that the

Provisionals should stop doing such

things. And why? Because they only strengthened the hands of those

opposed to a solution to the problem

Catastrophe, then, does not alter

people: but it makes the highlights

and darknesses of their nature more

pronounced. You cannot, I think,

read Walter Lord's ! Night to

Remember, about the sinking of the

Titanic (Mr Tam Dalyell probably

blames Mrs Thatcher for that, too).

On that tragic occasion, the cool

and the brave behaved more coolly and more bravely than ever before.

the weak and cowardly more like

weaklings and poltroons. Lightoller,

the second officer, who saved many

lives and would have saved more if

the incompetence of others had not

prevented him, plainly had no idea

of the resources of bravery and selflessness in him, but he displayed

both in exceptionally great measure;

which - to put it with positively excessive moderation - Sir Cosmo

Duff Gordon did not. But I do not

suppose Sir Cosmo, either; knew his

without sensing this truth.

of Northern Ireland

Bishop's regime. Russell Budhlall, a detainee, wrote a complaint to the authorities through his lawyer, dated September 30, 1980: "While they was burning me the others was punching me and some was hitting me with a gun butt. Then I receive kick and the feller that kick mename Bread, I don't know he right name... they take off my underpants and what they had burning me with and what they had burning me with was pushed up through my bot-

Such grisly facts of dictatorship in practice seem out of character with Bishop's background. Born to a prosperous family of hoteliers in the Netherlands Antilles in 1944, he studied in London from the age of studied in London from the age of 19 and became a barrister. Like Castro, he made speeches of extraordinary length. The "Line of March" speech, delivered to a closed audience of his New Jewel Movement on September 13, 1982, is crucial to understanding his politics.

"To build socialism requires central planning of the economy and society as a whole," he said. "It requires a serious Marxist-Leninist vanguard party leading, guiding and directing the whole process."

At one point he brags about the party's dictatorial powers: "You get detained when I sign an order after discussing it with the national security committee... Once I sign it like it or don't like it - it's the hill for them" (Presumably a reference to Richmond Hill prison in St George's.)

The full extent of his ambition is contained in one telling passage:
"...one thing we do have is political
control (and we have that firmly) so we can decide on how much taxes to charge, we can decide who gets credits, we can decide who gets ions and pioneer incentives. we can decide what kinds of laws to pass and when, we decide who to 'manners' and when...

them, even though they might otherwise have lived and died in bed

without anyone - particularly themselves - ever suspecting of what

they were capable. But this truth is

by no means confined to questions of courage and cowardice: it is

character I am speaking of, and it is

Times Newspapers Limited, 1924

It is tempting to spend an idle

tained electronically timed bomb was more suited to the IRA's grim plans at Brighton. A radio-con-trolled bomb could have been accidentally triggered by the trans-ceiving equipment of police and security men: a timed bomb is logistically far simpler than a radiocontrolled one; it is less flexible unsuited, for example, to vehicle ambushes - but it does not require someone with a transmitter to, detonate it. Neither type of bomb would be easily detectable from the background radiation which its

> Why did sniffer dogs fail discover the bomb? Dogs, like human beings, are not infallible. Dogs trained to search out explosives, and machines which fulfil a similar function, rely on the carelessness of bomb makers. Minute particles of explosive substance are usually left on the packaging of bombs. If the bomb is assembled with surgical hygiene and then placed in a seeled container. then placed in a sealed container, and concealed within the permanent

amount of metal. To have subjected the Grand Hotel to a totally thorough search by

Michael Yardley

A strategy to beat the bombers

Along with the grief and anger over the Brighton bomb, a degree of hysteria has shown itself, particularly over the TRA's probable use of

a "long-delay" time device.
Commander William Hucklesby's comment that such a device was a "new" development was unfortu-nate. Devices of this kind have been turning up in Belfast arms caches since the mid-1970s and have already been effectively used by the

The difference today is that they are smaller and more reliable. Electronics journalist Ian Pitt notes: "All that is now required is a small printed circuit board and a not bulky power supply." A very similar electronic circuit forms a core part of most video tape recorders. The advantage that timed bombs have over the potentially no less deadly over the potentially no less deadly radio-controlled ones is concealability and simplicity.

A radio-controlled bomb requires an aerial of some kind, usually a piece of wire. Obviously, a self-conelectronic circuits might emit, though a timer with only a small power source would be even more difficult to pinpoint than a receiver with an inevitably larger battery

structure of a building, the chances of detecting it are minimal especially as the completed bomb was probably no bigger than a small brief case and is unlikely to have contained more than the smallest

metal detector or x-ray would not have been possible. All rooms have metal in their walls; every plastered over hot-water pipe could poten-tially have been a bomb. Rather, security officers would have looked for the unusual. It is no indictment of them that they found nothing.

arrangements similar to those at airports should be introduced at events such as party conferences. However, the system operating in most airports will not deter the professional terrorist, though it may reassure the uninformed traveller.

Total security is not achievable. The current regime in Poland for example, is extremely repressive, yet Solidarity's underground still exists, and although of course it is not a terrorist organization, it retains the potential to become one because of its structure. One can find dozens of other examples of secret or under-ground organizations that have survived despite the police state in which they operated. The most any security system can hope to do is to cut down the number of incidents. Total security is simply not possible. It is even less desirable.

In what direction might the

proposed Whitehall Cabinet Security Committee look? Evidently, the rotection surrounding individual politicians and other people potentially at risk should be made as effective as possible. One of the great problems here is that it is difficult for security staff, especially those permanently assigned to a specific subject to maintain a constant vigilance. To a certain extent bodyguards, like army bases, rely on intelligence reports to decide on the level of protection necessary at a given time. This principle may no longer be viable, particularly as the intelligence services are not infallible but suffer from a degree of inter-departmental rivalry. The comittee should nevertheless

make every effort to encourage a full exchange of information between intelligence agencies themselves and the police. A great part of the problem appears to lie in communication. The Royal Ulster Constabution of the constab lary are known to be angry that Scotland Yard did not take full notice of its warnings or operational experience. The committee may decide on a far greater exchange of personnel of all ranks between those agencies involved in fighting terrorism. It may also decide that there is a need for a purpose-built highly secure conference centre, with accommodation attac ed, and a suitably screened staff. It may suggest that a delegation be sent to the US to study the methods used by the secret service in protecting the president. In the final analysis it must encourage a flexible approach to security, possible by new appointments, that can cope with an enemy which will take advantage of any perceived weakness or rigidity. The basic problem of all security planning is not the technical but the human factor The author, formerly a British army

of Economics.

Tough talk, not soothing talc

it is increasingly difficult to ignore the fact that large sections of the population smell.

I first noticed it some five years ago, in the Midlands, at a performance of *lolanthe* by the late D'Oyly Carte company I was in a box Everything was fine during Act 1 except for the din of chubby wrists wrestling to escape the confines of Quality Street boxes and the ensuing slurping when their cargo eventually reached port.

By Act II the temperature had begun to rise and as Private Willis. started his sentry duty, one could ignore it no longer Elevated by the rising heat was a thin mist of talcum powder floating just above the heads of the stalls and a suffocating smell of the same a combination of rotting flowers, bathroom cleaner and custard powder Private Willis could be seen clearly only from the waist up and, far from marching appeared to float along in an unsuitably ethereal and unmilitary manner. One was scarcely surprised when he did become a fairy in the

finale and went up and away It is the talcum powder that does it not cheap scent or deodorants. I have looked into it. And the reason there is so much of it about has to do with the new bath culture that is attracting all ages in alarming proportions. Last week this newspaper prominently reported the Schools Health Education Council survey of 2.870 secondary school pupils. What had they done the previous evening? Half had done no homework: they had had a bath.

Ninety per cent of the girls had had two, three, four, five, six, seven or more baths the previous week, as did 80 per cent of the boys - 14-yearold boys! There is a more serious side to this than the stench of post-bath tale. The proponents of obsessive bath culture think it is healthy. They are like that older generation which identifies food hygiene with frequently polished kitchen taps, ladies who are forever wiping their plastified working surfaces with damp cloths while their de- and re-frozen raw food sits alongside cooked food that should have been discarded a week ago, both destined to be inadequately heated. The cloth of course is full of neated. The cloth of course is full of germs which the wiping spreads; the germs particularly enjoy their favourite damp but warm climate. So with the bath and take brigade. While the tubbing and taken gets ever more furious so, less noticed the inventile manuscript.

the juvenile gonorrhoes rate rises. This obsession with appearance, the substitution of shirp taps for hygiene, afflicts those who currently ask if Mrs Thatcher's Butain is a sufficiently compassionate society The credentials for joining that debate are not a carefully thought out comment or a closely formu-

lated policy but a competitively flamboyant, vague and shallow carespeak. What grieves the Bishop of Durham perhaps more than whether the Government's policies actually best care for the majority of the population, is whether it seems to care that it does not seem to care

Not enough talc. Rarely have the overworked Three Cs - care, compassion and community - been used so sloppily Why, if churchmen want to talk sociology instead of theology, do they not study it first? Communities are not always nice things to be preserved, even when, often when, they are "closely-knit". The vain repetition of the words "care" or "compassion" has no magical effect. It does not create compassion.

Why don't they talk theology? The Christian tradition, as opposed to its popular rendering, has a sophisticated and robust understanding of love, hammered out in two thousand years of thought, talk and action. It is desperately needed, the real thing, not some ersatz version sentimentalized for the media. It would be understood. Parents know their children require not frothy endearments but tough. enduring and sometimes painful live. The dichotomy fashionably erected between efficiency-realism and compassion crumbles when we follow Pascal's first moral precept and think clearly and toughly about what compassion involves. This sort of compassion, the

genuine thing, is complex sometimes apparently paradoxical and, like genuine health, an interior quality initially hidden and clusive. It is not easily explained in press interviews and public letters. They risk trivializing it, replacing it with shallow and misleading symptoms such as spending on public services or anecdotal measurements of invective. The unreliable symptoms are so obviously borrowed and bear clear ideological stamps. The message ceases to be about the eternal doctrine of Christian love and becomes a weak reiteration, to paraphrase Temple, of ephemeral political slogans, the very care-speak that a sophisticated Christian understanding of compassion should be replacing.

To be sure there are arguments for

speaking out, arguments for not keeping the truths of Christianity in the sanctuary But it is not so much a question of speaking or not speaking more of what sort of thing is said. People, at least some people, can take more than secularisms or vague and minutely balanced kindly observations. They should be given the real thing. As it is, after all the effort and anguish of debate, what hangs in the air, on both sides, is a smell not of cordite but talc. The author is Director of the Social

Affairs Unit.

The cost of Scargill: Lawson's missing millions

Mr Lawson told the House of Commons on July 31 that the additional Exchequer cost being incurred because of the miners strike represented "even in narrow financial terms... a worthwhile investment for the nation". He based this claim on the assumption that the strike had, until the end of July, cost £400m, or £20m a week. But this figure looked extremely low - much lower than any of the independent estimates of the cost and Treasury and CEGB press officers have since raised further suspicions by refusing to substantiate this figure in any detail. It is therefore noteworthy that the October Economic Progress Report to be published by the Treasury today is rumoured to include estimates of the cost of the strike or, at least it did before it was It will be interesting to see how much detail filters through the

ministerial sieve. Pending today's Treasury figures, it is difficult to see how so much confusion has been spread about so relatively straightforward a matter as the strike's running costs. Since Simon and Coates' original £60m a estimate of the costs was published in early June, considerable new official information has PHS appeared, but this has not seriously disturbed our calculations. Furtherappeared, but this has not seriously

more, several other City estimates have since been published, all in the same area as our £60m per week calculation of the eventual gross cost. Of all the estimates so far, only the Treasury's is substantially lower than this figure. Why? One reason seems to be that the Chancellor's £20m figure related only to the cash costs which had been incurred by the Exchequer up to the end of July. Bills which were assuredly in the post as Mr Lawson spoke were ignored, but they will catch up with him sooner rather than later.

The gross accounting cost of roughly £60m per week is made up as follows. First, the NCB has on average been losing 1.5 million tonnes of coal output a week, Allowing for the fact that some of this would have gone to stock, rather than sold to final customers, especially in the initial stages of the strike, accountants would probably value this lost production at about £55m to £60m a week. On the other hand, the Board is saving about £30m a week in labour and other running costs. So the net weekly cost to the coal industry is about £25 to

The second main element of the accounting cost is being incurred by the electricity industry, which is substituting relatively expensive oil for relatively cheap coal to the maximum possible extent in its half the level they probably would

generating capacity. The latest official figures for the month of July show that an extra 400,000 tonnes of fuel oil were used per week by the power stations, displacing some 700,000 tonnes of coal compared with normal procedures. The net cost of this transfer, allowing in full for the coal savings, comes to about £22m a week.

Other elements of the gross weekly cost are smaller than those incurred by the NCB and CEGB. The British Steel Corporation reckons it is losing £4m a week. while lost tax revenue and social security payments for the striking miners amounts to at least £6m a week, Finally, policing costs (net of income tax) are probably running at a minimum of £3m a week.

All this produces a gross total at least three times higher than the Treasury estimate of £20m, and it is

important to note that the main elements have been confirmed by the industries themselves. One reason for the large discrepancy is immediately clear, since the Treasury figures probably relate to cash costs incurred so far, they count the money saved by the electricity industry in running down its coal stocks during the strike as a major offset to the gross costs incurred. CEGB coal stocks now stand at about 15 million tonnes, roughly

have reached in the absence of the strike. The failure to buy this coal for stock has temporarily saved the CEGB about £650m in cash, or about £21m a week during the strike, and this explains about half of the £40m difference between our esti-mate and the Treasury's. The remainder is so far unexplained, but it seems possible that the Treasury is failing to make allowance for the NCB losses which have not so far resulted in a claim on the Treasury

When the strike ends, coal stocks will be at least partially rebuilt, and the NCB losses will be picked up by the Treasury. The eventual cash cost will then climb towards the full £60m a week of elapsed strike time (or £1.8bn so far). A combination of (or 11.3011 So 1817. A communation of raids on the contingency reserve and higher electricity prices will probably prevent this from flowing through to the PSBR. But someone, somewhere will pay - whether it is the electricity consumer, or the unemployed who could otherwise have benefited from a jobs package funded by the contingency reserve. These groups may wish to question Mr Lawson's view that this strike is an excellent investment for the

WANTED: A NEW PLAN FOR COAL

The collapse of the pit talks convened at Acas at the behest of the pit deputies marks - and should be seen to mark - the end of the peace process that has been pursued through a fitful series of negotiations since May. It is now clear that the leadership of the National Union of Mineworkers will not accept any formula that is likely to reduce taxpayers' annual £1 billion subsidies to the coal industry or to convert it from that outpost of Eastern block output norms revealed by the Monopolies Commission to an organization run on a humane long-term commercial basis. That is to say, the NUM leadership will accept neither the policy which Mr Ian MacGregor was appointed to pursue, nor his method of implementing it. And that should now be as clear to the pit deputies, who may now have to decide individually whether to intensify the dispute on the NUM's behalf, as it is to anyone

The pit deputies made a genuine attempt to bring the strike to an end and, although the final formula would have tallen far short of giving the taxpayer a fair deal, it is a great pity that it failed. The consequent fall in the pound, with its knock-on effects on the whole economy, is a powerful reminder of the cost of the strike to the miners, the long-term prospects of the coal, the public purse and to the peace and cohesion of society. Yet that failure is also, in another sense, a relief.

The National Coal Board's original proposals in March were generous and far too open ended in combining commitments to compulsory redundancy. hefty redundancy benefits and ministerial undertakings to plough £3 billion of investment into NCB operations over four years, regardless of any agreement by the miners to cooperate. Progressive concessions made during negotiations would effectively have withdrawn existing announced pit closures, withdrawn the compendium plan to close four million tonnes of hopelessly uneconomic capacity and forced any proposed pit closure to go through a procedure made even longer, more cumbersome and less certain at enormous extra cost to the

Meanwhile, the economics have moved sharply in the opposite direction, leaving the NCB offer, underwritten

entirely by taxpayers' money, and financially unrealistic. Onite apart from the running costs of the dispute, the budgetary cost in 1985-86 and subsequent years would have to meet the cost of rebuilding coal stocks at the power stations. It would face the costs of slowing the closure programme when the deterioration of many coalfaces would dictate an acceleration. The need for repairs and maintenance will have pushed many more pits into the hopelessly uneconomic category. The reminder that supplies of coal are unreliable has already cut the potential demand for coal from new customers. And if investment in new low-cost pits is to be maintained, ministers must decide whether to plough yet more taxpayers' money into rehabilitating marginal pits that cannot be justified on normal investment tests.

The time has now come for Mr Peter Walker, the Energy Secretary, to withdraw the unconditional commitments on which Mr MacGregor's final terms were based. The generosity of the deal offered to the miners has failed in its questionable purpose. If any new negotiations are to start, they must start with a clean sheet, with the NCB offering terms that reflect the realities of October 1984, not those of March. Certainly there should be no refusal to negotiate or to compromise, but any negotiation must start from the new, inevitably harsher, realities brought by seven months of

It is more than ever likely, however, that the strike will now end through the decisions of individual miners to return to work, rather than a national settlement. Spelling out the new realities should give miners an even greater incentive to end the stoppage, even though that incentive will now be more negative, more of a stick than a carrot. As Mr MacGregor has hinted, there should now be a time limit - a month would suffice - on a majority return to work if the voluntary principle on redundancy is to be kept or any extra investment funds provided to rehabilitate damaged pits. Economic realities should not, however, be a cloak for punishing miners. Indeed, more emphasis, and more financial flesh, should be put on plans to regenerate communities that the loss of

The collapse of the Acas talks also removes any excuse for the Energy Department to delay a thorough review of the state monopoly of the industry, whose failure has been exposed so clearly by the strike, with a view to legislation to restructure the industry. Any such review must start with the Government formally abandoning the Plan for Coal - and it would be helpful if this were made clear at the outset. Theological dis-cussion over the minutiae of the plan have veiled its essential bankruptcy.

Since the plan's inception in 1974, the NCB has consistently failed to achieve its productivity targets, except, ironically, just before last year's overtime ban. The envisaged changeover from old high-cost capacity to new low-cost pits has not been achieved because of the snail's pace of closures. And in any case, demand for energy in 1985 will be 100 million tonnes of coal equivalent less than forecast - a warning against all such plans.

Separating the NCB's role as a commercial business from its role as regulator of the industry and owner of mining rights and ending the state monopoly of production, offer the best hope of improving the efficiency of the industry, cutting public subsidies and ensuring better security of supply to enable the coal industry to exploit that exciting potential of which ministers and both sides of the industry have spoken so glowingly.

Setting up a separate National Coal Trust to own mining rights and franchise mines could provide a framework for restructuring the industry, for putting the responsibility for social costs with the community, where it belongs and perhaps for the mothballing of presently lossmaking pits that might have some long-term strategic worth. The monolithic structure of production should also be changed by privatizing the NCB's opencast operations, which made £200 million profit last year and by putting viable mining areas into separate, preferably worker ownership. Such moves could take 40 per cent of coal output outside the state sector. There need be no hasty decisions. But it should be made clear that clinging to existing forms for the supposed sake of industrial harmony is no

PARISH PUMPS IN DECAY there are changes needed to

A Labour-run London borough has just appointed as its chief official in charge of social services a councillor who is chairman of social services in a neighbouring borough, also Labour. In another urban authority a municipal trade union enjoys power of veto in the selection of Labour's council candidates (who usually win seats). In a proud provincial city applicants for the chief executive's job are to be quizzed on their familiarity and sympathy with Labour's election manifesto.

· These are examples of a degenerating civic culture. In each, public and party interest come perilously close to merging disinterested administration is made impossible; councillors play favourites with the general revenue. In none of these is the law broken. Of course there is nothing new about sectional interests threatening good local government. What the rise of the New Left has done is expose a set of laws and conventions based on polite, part-time, limited municipal service. Increasingly, in urban Britain, they are inadequate.

Last week in Brighton Mr Jenkin spoke vaguely of a judgeled inquiry to make practical recommendations. Doubtless those general revenue-raising sections 137 and 142 of the 1972 Local Government Act. But Mr Jenkin needs no judge to tell him that Camden's Labour councillors can appoint their ideological soul-mates as their officers because they are not accountable: because only a fraction of those who vote pay the municipal bills; because Camden's largesse comes from the Prudential Assurance Company and its other commercial rate-payers. The collective memory of the Department of the Environment can supply him with reams of reports and analyses from Sir Frank Layfield's herculean effort in the mid-1970s through to the recent Audit Commission study of the grants system: they will instruct him on the need for a local tax to run alongside the rates, and amplify the argument that locally-elected councillors are, when all is said and done. best placed to handle local problems. In short: if, once the people of Camden are paying for

the foibles of their governors, they still choose to elect them, that, warts and all, is democracy. If ministers do not believe that proposition then the inquiry into council finance now under way (the second rabbit Mr Jenkin pulled out during the debate on rates at Brighton last week) is

pointless. The government might as well begin at once to assemble the administrative machinery it would eventually need to replace elected councils. As it is, the inquiry looks rather like a convenient way to let ministers scratch their heads, to allow them - as on Monday this week to soothe the protesting Conservative councillors from the shires with promises of detailed and technical study of grant formula, Yet it might have some value if, for the umpteenth time, it reminds ministers, public and councillors alike of some uncomfortable propositions.

Any system which relies on central government's sharing out money in parcels according to "need" is bound to be complicated, bound to pit town against country, borough against borough. Any scheme that attempts to reduce the impost on business without substantial cuts in outlays must mean heavier taxation - direct or indirect - on individuals and families. Any plan for genuine local autonomy means cutting councils free from the apron strings of government departments demanding they carry out this or that welfare function. Local government should mean less central compulsion, less administrative tidiness, less government all round.

Roots of violence

From Professor M. Hammerton Sir, In their discussions of violence in society, both Dr Runcie and his critics seem to share a tacit assumption which, if false, could have lead them to misconceive the problem. They appear to suppose that the normal state of society is one approximating concord, and that any outbreak of violence is a deviation from this norm for which specific explanations must be sought. I submit that a totally opposite view is at least consonant with the evidence.

Suppose instead that human - especially, perhaps, young males - may be expected to go on the rampage spontaneously from time to time, unless there is a very effective network of restraints and controls to prevent them.

In this country we enjoyed such a network for over a century, so that we came to regard its effects as part of the order of things. What has happened, according to this alternative view, is that the net has begun to disintegrate; and the problem is not to remove the "causes" of

violence, but to restore checks upon

I do not think that there is sufficient evidence to decide between these approaches; but it were prudent to bear both in mind.

Yours faithfully. M. HAMMERTON The University of Newcastle upon Tyne, Department of Psychology.

Ridley Building, Claremont Place Newcastle upon Tyne.

Slaughter on the wing From Mr J. G. Parker

Sir, Unfortunately Dr D. F. Owen (October 8) misses the crux of the case against the Greeks' barbaric shooting habits and so weakens it; the fundamental objection is not that they shoot migatory birds but that they do so in the spring breeding season, thereby killing the

geese that lay the golden eggs.

Shooting nightingales, oriolos, wrynecks, hoopoes etc in autumn offends our ideas but is unlikely to

reduce any but larger and less prolific species.

His concern about shooting of snine, woodcock and widgeon in Britain is unnecessary. These com-mon migrants breed across northern Eurasia from Britain to the Pacific; their habits render it improbable that legal shooting could, let alone does, have any discernable effect on the next spring's breeding populations.

On the other hand, current proposals to drain Otmoor and the Somerset Levels would have a more serious and permanent effect on our snip population than all British shooters combined since the invention of the breechloader.

Birds can survive in undimi-nished breeding numbers a reasonable level of human predation, but not destruction of habitat.

To hope that the Greeks would stop all shooting of migatory birds is baying for the moon - to expect them, and other nations, to enforce an adequate close season is reason-

LETTERS TO THE EDITOR

Lessons of the Brighton outrage

Police action in South Yorkshire

From the Leader of the South Yorkshire County Council Sir, The Home Secretary has used the platform of the Tory Party conference to repeat the slur that left wing police authorities under-mine police operations" (report, October 10). South Yorkshire is the authority quoted as his example.

May I categorically deny that South Yorkshire has ever had any intention of hampering the proper operations of the police. Our record over ten years shows that we have provided resources on a generous scale to ensure that our local police force is fully equipped and has access to all the advantages of modern technology.

The examination we have given during the current year to items of police expenditure has been occasioned by a desire to ensure that the Chief Constable's approved budget is spent in the most efficient manner. More seriously, however, the County Council has had to instruct the police committee to finance (from within its own approved budget) the extra expenditure resulting from the miners' strike which is not met by central. government.

To do this it has been necessary to consider numerous reductions, in-cluding the disbandment of the horse and dog units. The final decision on this matter was postponed pending the promised an-nouncement by the Home Secretary on additional finance from central government

But in any case there was never any suggestion that the Chief Constable should be denied the use of horses which he can requisition from other forces (incidentally, is it widely known that only 18 of the 43 police forces in England and Wales have horses?). Perhaps the Home Secretary can explain why the 25 forces without horses have not been attacked by him as he has chosen to attack South Yorkshire.

The whole problem has been caused by the Government's refusal to finance the total cost of the dispute. Indeed, until his announcement this week the liability of the local authority has been entirely open-ended. If 100 per cent central financing had been available from the beginning of this financial year the question of reductions in the police committee budget would never have arisen at all.

Even now the new announcement delayed for political reasons until after the party conference - will leave the police committee with over £2m to find from its overall budget of £60m.

Yours faithfully. ROY THWAITES. South Yorkshire County Council. ounty Hall. Barnsl South Yorkshire.

Church and state

From the Reverend Dr John Rodwell Sir. I cannot remember anyone stepping delicately through champagne glasses during my own time at Cuddesdon (Reverend A. V. Benjamin. October 11), but I do remember the good samaritan.

It seems to me that innkeepers have to be trustworthy too. Some of us are beginning to feel a little wary the care provided by this Government's hostelry, no matter

how much is paid or promised.

If the religious establishment wishes to cross the road to show its compassion (no easier now that when the story was first told), it helps to know that there are reliable partners with whom the work can be shared. Yours faithfully

JOHN RODWELL, Derwent Road, Lancaster. October 11.

Brontë photograph

From Mr R. M. Golen

Sir, Further to the alleged photograph of Charlotte Bronte (report, October 11), there is reference to at least one known photograph of Charlotte in Whiteley Turner's A About Bronteland (1913).
Interviewing one of Charlotte's former Sunday school pupils, Tur-

ner says on p. 200:

Apologetically we remark upon a photo of Charlotte's on the mantlepiece. Mrs T—does not consider the picture a good likeness of her teacher. She always wore her hair as the photo depicts, parted in the middle and combed straight down over her ears. Yours faithfully,

R. M. GOLEN 38 Lees Bank Road, Haworth West Yorkshire. October 12.

Youth service From the Chairman of the British

Youth Council Sir, The British Youth Council, as a major voice for young people in Britain, believes strongly in youth involvement in the community. So we welcomed your series of articles on further ideas for community involvement last week (October 1-

However, in expanding and prompting this involvement, we advocate certain basic principles not all of which were evident in the articles.

There should first be a recognition of the good work aiready done in a wide range of voluntary groups involving young people in their community

BYC plays its part targety through the promotion of local youth councils, allowing young people to take action together to improve their community and their situation within it. We believe the key to this coordinating the campaign against terrorism throughout the British Isles and Eire – surely merits immediate consideration. Such an arrangement would involve direct contact and cooperation between the

always previously opposed.

From Mr.R.N. T-W-Fiennes security commission with the task of Sir, Now that the IRA have attempted to blow up the Prime Minister and her Cabinet, perhaps common sense and reason may be allowed to prevail?

Events in Northern ireland cannot be controlled unless there is an identity card system enabling the police authorities there to check who is living in different areas, whether Catholic or Protestant.

Some years ago, my wife attended a meeting of Conservative women in Devon addressed by Mr Douglas Hurd. In answer to a question she posed. Mr Hurd replied that such cards would be against the British tradition and an infringement of the liberty of the subject. However, he put the matter to the vote, and there was a unanimous resolution in favour of identity cards, apart from those on the platform. Mr. Hurd remarked "How extraordinary!"

Identity cards should contain a photograph and a thumb print.
During the Mau Mau troubles in
Kenya, when my wife and I were
living there, cards were introduced for black and white citizens alike on these lines. There was the usual outcry from a vociferous minority of whites, but the overwhelming majority welcomed their introduc-

All the EEC countries, Britain apart, have identity cards, without which it is impossible to keep checks on a country's citizens, missing. persons, illegal immigrants, criminals and saboteurs. We had identity cards in the war. Why not now?

Terrorism will never be controlled unless everybody can produce a document of identification. It should by illegal to give employment to any person without a card or a work permit. Social security pay-ments should be refused to anybody unable to produce a card.

In such circumstances, can it be doubted that unemployment figures would decline significantly?

book in its field of interest" then he

is obviously unaware of the obsolete

Hoovers with which most British

academic institutions are currently

books would further limit the crist that could be bought by libraries and lead to a reduction in the publication of research findings.

Education would be damaged; research slowed; and British scientific influence reduced - and yet we are told on all sides that investment in education and research is fundamental to Britain's economic recovéry.

The draconian cuts of recent years Yours faithfully, mean that university, polytechnic R. J. JOHNSTON. Department of Geography, University of Sheffield. and college libraries are unable to buy more than a small percentage of the serious books being published in

Sheffield.

Protection of churches

From the Reverend Giles Hunt-Sir. I rather sympathise with Mr

Claude Blair's feeling (October 9) that "deans and them" (an endearingly dismissive description used by an ex-parishioner of mine of all ecclesiastics who made visitations to the parish) are complacent about the Church's protection of its heritage. Of course there are black spots.

But the defence of the ecclesiastical exemption is not that it works perfectly, but that it works much better than the alternative - i.e., some form of state control and funding - would be likely to. (A trip round French cathedrals would be informative).

After some twenty years' experience of being responsible for, and having to raise some money for the repair of historic churches, the two practical improvements I would like io see are:

i. For the national grant-giving bodies such as the Historic Churches Preservation Trust (who are an immense help) to combine in compiling and keeping up-to-date a list of architects who are really competent in the rather specialised field of conservation of churches.

Diocesan advisory committees are of some help over this, but it is difficult for such local bodies to speak without fear or favour, and

good work must be locally-based identifying and meeting local needs.
The last thing we need is more Whitehall bureaucracies telling local encies with young people in them communities what they want.

Secondly, those involved young people must be treated as adults. That means choice, status and income. They choose whether to do the work. Then they decide the type, organisation and plauning of that work. As your MORI poll showed, young people would prefer to start work or remain in education. And this must be part of the choice offered. Above all, community involvement shouldn't rate second best because nothing else is avail-

But community involvement should have status too. Young people shouldn't be servants for the community. They must be fully involved and participating members of that community. Nor, of course, should youth be used to make up for health, education and social services

also parishes are more likely to heed the advice of (say) the HCPT, who are offering practical financial help as well, than the advice of a DAC whose main role is to tell parishes they can't do what they want to do! 2 For the Government to cease charging VAT on repairs to historic churches.

Having experienced various church architects, I have learned how much they vary in competence and what an enormous difference it

makes to have a good one.

And over VAT, the Chancellor could recoup his loss by abolishing DoE grants, which must be expensive to administer (they involve a lot of paper-work and duplication of architects); recent major repairs here attracted quite a large DoE grant that was almost exactly cancelled out by the imposition of VAT. Discretionary local authority grants. though, are most helpful.

At the end of the day, three things are required; a desire to maintain the building and its monuments: sufficient funds to pay for the work and really competent supervision by an architect. And it is the architect, in practice, who is crucial on all three counts.

Yours faithfully, GILES HUNT. Preston Vicarage, Preston Lane, Faversham, Kent.

cuts, as some of the comments quoted last week seemed to imply:

A good income is crucial if young people are to do longer-term community action work. But because youth are taking part in other training, education and employment shouldn't prevent them being involved in the community too. And BYC would like to see much more

community involvement offered

in short, we want, more oppor-tunities for good involvement by young people which would build on the many good programmes run by existing agencies. Though it is a pity that community involvement seemed to be treated as a secondrate option for young people by some of those commentators quoted in your columns last week.

these young people.

Yours faithfully, MALCOLM RYAN, Chairman British Youth Council. 57 Chalton Street, NW !. October 11.

Inflation and unemployment

From Mr J. L. Carr Sir, If expansion by Government borrowing and spending would be bound to have an inflationary

afternath, as you assume in your leading article today (October 12), why isn't inflation rampant in the USA? Answer (obviously) because the American Government has had the sense to combine fiscal expansion of the first sense to combine fiscal expansion of the sion with tight money. We could do the same here, and lin to defeat terrorism; - but this appears to be implied by the recent reaction of Mr. FitzGerald to the cut intemployment appreciably in the next year or two, if the British Government would accept that marginally higher interest rates need not inhibit growth any more here

than they have on the other side of the Atlanuc. Yours faithfully. J.L. CARR, 56 Bournemouth Prive.

Herne Bay. October 12

Happy returns

From Mr Cyril Bleasdale

their fields of interest: VAT on Sir. In an article, "Doncaster tops train league" (October 2), you refer to the analysis by Dr Ferry which questioned whether electrification of our East Coast main line is really necessary in the light of the excellent performance by Intercity 125 trains

on the route. The case for electrification approved by the Secretary of State meets the stringent test of producing a 7 per cent real rate of return. This return comes more from the savings from lower operating and maintenance costs than from revenue improvements, although we are confident that the cleaner, more service with new

equipment will attract more passen-While modernisation of the East Coast main line is in progress we will also be pressing ahead with improvements to the West Coast main line electrified in the last decade to ensure that equally high standards are offered on both main lines in the next decade.

Yours faithfully. CYRIL BLEASDALE Director, Intercity, British Railways Board. 222 Marylebone Road, NWI. October 10.

No cash on delivery

From Mr. F. Roy Coad Sir, As ever London (or father British Rail, Sevenoaks - Mr Tim Connolly, October 11) simply

Connelly: October 11) sumply follows targely in the footsteps of the hard-headed North.

[3t has been possible for some time to find "pay and display" car parks in "Cumbria" which "thoughtfully accept 50p pieces if the motorist does not have the wint care blastim. does not have the right combination of coins to meet the 15p fee. But. like Sevenoaks station, the Cumbrians give no change. Yours faithfully, F. ROY COAD. 18 Kings Avenue. Carshalton.

Two-point turn

Surrey.

From Dr A. Canale-Parole Sir, Dr Perkins (October 5) may be interested to learn of a device used by the French fire service several

years ago.

The front balves of two Citroen 2CVs were joined back to back, so to speak, to provide a vehicle equally happy traveling in either direction. This was used in fighting forest fires, allowing firemen to travel quickly along the forest tracks, and, should the need arise, escape equally as years ago. the need arise, escape equally as quickly back along the same track, without the need for a three-point

In Dr Perkins' case, this would no doubt achieve the ultimate in automotive efficiency - the onepoint turn. Yours faithfully. ADRIAN CANALE-PAROLA. Clifton Road Surgery. 26 Clifton Road, 30565

Rugby. Warwickshire. October 12

Science report Looking at living cells without recourse to test tubes

By Judy Redfearu

Living cells constantly undergo chemical change as they take in energy and building materials and excrete waste

Traditionally, the only way to study such chemical processes, or cell metabolism as they are called, is to look at cells in a test tabe, a far cry from their normal habitat.

But now that is changing. A recent technique is making it possible to study living cells in sits. It is called unit (nuclear

magnetic resonance) troscopy. Nmr spectroscopy is not only providing researchers with insights into how cells work, it is also proving a useful tool in the diagnosis of

certain human metabolic disorders, for example, those that affect the way in which muscel cells convert sugar into energy. It relies on the fact that the nuclei of certain atoms behave very like tiny bar magnets. When placed in a strong magnetic field, they line up with it and absorb radio waves to stip into an alignment against the sield. The frequency of the radio wave to which a molecule responds

indicates which elements are present, where and when. So far, phosphorous has proved most helpful in diagnosing buman disorders: its is susceptible to magnetic fields and is contained in molecules involved in

the storage of chemical energy inside cells. But the most useful nucleus in theory at least, would be bon. It is everywhere in living things and is directly involved in the transport of material and energy to and from cells. The chief difficulty is that only the rarest form of carbon,

carbon-13, has a magnetic nucleus and nurr spectroscopy as so far been too insensitive to detect the small concentrations in which it is naturally present. All that could change, however, if a new method of data analysis developed by a group of mathematicians and chemists from Cambridge fulfils its promise.

Sibasise Sibisi and colleagues have developed a technique which, they say, significantly increases the sensitivity of mor spectroscopy by sorting out the umr signal from the background "noise" better than ever before.

Normally, several nmr spectra have to be recorded and added together before an acceptable reading is achieved. when the spectra are added, so too is the "naise", small spurious readings that are probably due to the equipment. Sorting out the signal from the "noise" can be quite a can be quite a difficulty.

The Cambridge team claim to have a mathematical tech-nique, called the maximum

entropy method, which separates the signal from the poise using fewer comulated spectra What is more, they say their method gives a sharper and clearer signal than ever before. Its one disadvantage is that it takes quite a bit more comtime than current puter i

But if their technique does prove itself and is widely adopted, then now spectroscopy will have come of age. For it will then be possible to take spectra of carbon-13 nuclei in many circumstances that are now impossible. We will then be watching the life cycle of the cell as it happens. Source Nature, vol 311, p446 (October, 4 1984).

LAN

FINANCE AND INDUSTRY

Executive Editor Kenneth Fleet

Can lend, lend, lend do exports credit?

If exports cost public money, are they worth it? Yesterday. Mr lan Byatt, of the Treasury, revealed to a conference on export subsidies that the cash deficit of the Export Credit Guarantee Department, running at £200m, may rise as high as £800m by 1986-87, in consequence of the need to refinance part of its total contingent liability of £35 billion.

At this level. Treasury loans to the ECGD become a significant element in the Government's public spending decisions. But rescheduling international debt is the necessary result of decisions taken in the past; the nub of the debate, organized by the Public Finance Founder and the Trade Policy Research Centre, concerned future government policy.

As far as cover by the ECGD (in whatever form the institute survives) is concerned, there is no argument; the ECGD is supposed to pay its way. The critical issue is the use of interest rate subsidies on export credits, together with "mixed credits" - a combination of subsidized credit and pure aid to finance

British exports. Nearly two years ago, Mr Byatt and an interdepartmental group of government economists had the temerity to question this issue of funds to support British capital goods exports selectively. Last year, the argument dimmed a little with international agreement to raise minimum interest rates on export credits to developing countries, and review rates sixmonthly in line with market rates; as these were declining anyway, the subsidy gap was narrowing.

Since then, however, market rates have risen - and the Treasury's estimates of the public expenditure costs of interest-rate subsidies, which were to have been eliminated by next year, have also gone up. Yesterday, Mr Byatt threw himself to the lions of the Department of Trade and Industry and Britain's capital goods industry to contest the merits of such subsidies to an industrial sector providing only 8 per cent of manufactured exports.

The menagerie included the usual number of shabby tigers determined to defend their vested interest. But other participants mounted a very respectable defence of the use of credits to match those offered by other governments, given the underlying competitiveness of this sector of British industry.

Clearly it would be advantageous if all governments were to cut export subsidies. The United States is taking a useful lead in this. Meanwhile, there is a particular expense touched on by Mr Byatt, incurred by the growing use of dollar finance. All other governments could agree to limit this dangerous form of capital export competition.

Time to tune in to Racal's offer

As Brooke Bond discovered, a defence against a takeover bid which essentially is a plea for a second chance for a management with an indifferent record is unlikely to succeed. Fund managers especially cannot afford emotion unless it can be priced with some accuracy.

Chubb & Son, a revered name in a land of lost opportunities, has little, if any, real claim to shareholders' loyalty in the face of a reasonable all paper bid from Racal worth about 287p.

To believe that Chubb management has seen the light of a new dawn would be a triumph of hope over experience. The company plainly needs a a new dynamic and a new dimension. For too long Chubb shareholders have waited for the company to assume what once seemed its rightful

NEWS IN BRIEF

UBM, the building supplies

group, has sold its scaffolding

division to British Electric Traction for a cash payment of

£5.8m. The division will be incorporated into the BET Access subsidiary. UBM Scaf-

folding has an annual turnover of around £10m and profits of

£1.1m are forecast for the year to February 1985. The acquisition will provide BET with an

annual turnover of £75m from

its scaffolding and access interests. Tempus, page 18.

from £275.9m to £262.6m. The

final dividend of 3.7p makes

Corporation announced a 24 per cent rise in pretax profits for

the year ended June 24 1984, to £8.31m. Net asset value rose to place in the rapidly expanding security

Racal is right to stress that Chubb needs the injection of systems and communications technology which Racal is equipped to provide. Together they would

form a group with enormous potential

The industrial logic behind Racal's offer is not denied by Chubb. It is also hard to see Chubb's share price remaining at or near its present level if the bid were to fail. The only question in the minds of shareholders, who have until tomorrow to say yea or nay, is the likely future value of Racal shares. Business in the United States is booming, it may be picking up in tactical radio; cellular radio and the Racal-Vodaphone are taxiing for take-off in 1985. Chubb would be a valuable addition in Racal's next phase.

Chubb's advisers, County Bank, complained yesterday to the Takeover Panel about Racal's claims of acceptances received. They want a definite figure. Acceptances have undoubtedly come in at a good rate and they are gathering momentum. Shareholders still in doubt should accept Racal's terms.

Corporate losers in the pit dispute

Strike-bound shares

	Share price (p)	Fall yesterday (p)
Associated Heat Services	308	8
Babcock International	137	4
Bridon	102	4
Burnett & Hallamshire	130	10
Dobson Park	72	4
Dowty Group	176	9
Matthew Hall	278	2
NEI	721/2	11/2
Victor Products	90	5 -

The stock market suffered one of its periodic kneejerk reactions yesterday. News of the breakdown in the pits dispute talks winded fund managers more than it should have done, possibly because hopes had been so strongly inflated before the weekend. Weak sterling and falling shares fed on one another's misery. The pound fell below \$1.20 for the first time and the FT Industry Ordinary index lost 15

In the teeth of the storm is a small group of shares which are particularly affected by the miners' strike. These belong to the companies, mainly engineers, which supply goods and equipment to the National Coal Board. One exception is Burnett and Hallamshire, which suffers because it operates some private drift mines and as such is subject to the miners' strictures. On some estimates it may be losing as much as £500,000 in profits per month because of the strike.

Of the others, the 32-week dispute's effects have been extremely varied. One factor is whether they supply the NCB with durable equipment, orders for which have merely been postponed, or whether their trade is in consumables such as pumps, ropes and lighting, where the business has effectively been lost for ever. The other question is how much of their turnover goes to the mines. While it is less than significant to the likes of Babcock and Bridon, Victor Products sells 40 per cent of its output to the NCB. Lord Ezra. former NCB chairman, heads another supplier, Associated Heat Services.

While yesterday's falls embraced all these firms, it is notable that some of the shares are actually higher than they were at the start of the dispute. This is true of Bridon. Dowly and Matthew Hall.

Well done, Beryll

It isn't easy being younger sister to a well-established star.

Luckily, Beryl B, sibling to Mobil's well-established Beryl A production platform, has a lot to offer on her own terms.

Supported by a steel jacket that weighs only a fraction of her sister's concrete bulk, Beryl B nevertheless stands tall and firm (with 130 foot pilings into the seabed to withstand the worst that the North Sea can come up with).

Inside, she's been equipped with Rolls Royce-driven generators supplying

39 megawatts - enough power for a town the size of Inverness. Moreover, that power is put to good use, injecting excess gas back into the oil reservoir to force yet more crude to the surface. Beryl B's upbringing has been an expensive affair. To date, the platform has

cost some £400 million, with more than 80 percent of that total spent here in the UK on the products and services of more than 400 contractors. At peak, Beryl B gave employment to more than 5,000 people and overall

involved 13 million man-hours of work. Now, just over four years since inception, Mobil's Beryl B officially comes of age, with an inauguration ceremony today.

Beryl B might not have been the first girl on her block. But with the potential to recover 300 million barrels of oil in her long lifetime, she does come in

TEMPUS

New men steer UBM back to full health

UBM's announcement that it has sold its scaffolding interests served as a timely reminder that on Friday Norcros will be free to revive its bid for the building supplies group. The two events are unrelated, but the sale of the scaffolding business to British Electric Traction for £5.8m is a clear indication that if Norcros does return to the fray it will be up against a different animal to the one which defended the

takeover attempt last year. The management of UBM now seems more confident about its ability to implement a long-term strategy. Inhibitions brought on by the 36 per cent stake which Norcros still holds in UBM have been cast off. The board would now have no qualins about seeking share-holder approval for any major aquisition which it wanted to

The group has also produced series of impressive results since the bid which confirm that the new management is on the way to restoring financial health. The key, however, to any new approach by Norcros is the share price which rose from 99p just before the bid to 167p yesterday. At this level it must be well above the "sensible" price which Norcros is prepared to pay to bring UBM into its fold. There is clearly an element of bid hopes in the price and Norcros would be unwise to make a move just

The best strategy for Norcros is to sit right. The absence of a bid might encourage specula-tive shareholders to shed their holdings, which could depress the share price.

There is also a growing belief that the building supplies industry will find trading conditions difficult in 1985, which will make UBM's task of maintaining its recent excellent run of results that much harder. If the bid is to be revived it might be better timed next summer.

This leaves Norcros with the problem of what to do with the 36 per cent in UBM it had never intended to acquire as an investment. At the moment it costs the company nothing to maintain the holding but neither does it produce a return, and the £27m tied up in UBM could be applied profitably elsewhere. Norcros is sitting on a paper capital

ing it is a different matter.

There is unlikely to be another company which would take the entire stake particu-larly at 167p. Any attempt to dispose of the shares in smaller parcels would inevitably drive trhe price down and reduce Norcros's capital gain. It is difficult to see how Norcros can win, and this alone might drive the company to eventu-ally revive the bid.

Paterson Zochonis

Paterson Zochonis continues to demonstrate that it can weather the problems caused by Nigeria's economic crisis. The company relies very heavily on trading there but was still able to report profits for the year up by more than £4m at the taxable level to

If anything, Nigeria has been one of the bright spots for the group. It has secured all the import licences it needs to ship in raw materials to maintain soap and detergent production and the capital investment in the Nigerian associate is now paying off. The share of profits duly increased from £6.3m to

Paterson has cleary been helped by the Nigerian govern-ment's decision to classify soap and detergents as essential commodities. The same status has not been granted to refrigerators and the group's ligerian manufacturing subsidiary suffered accordingly.

Paterson still has problems in Greece and in Britain through the Cussons Group and its prospects for 1984-85 remain dependent on next year's round of Nigerian import licensing

However, the share price, up 7p yesterday at 140p, fully, reflects these uncertainties. In the short term, there is little to excite but at this level there is a case for a prudent accumulation of the shares on a longterm view.

Peachey

Peachey Property Corporation looks set finally to shake off the slightly tarnished image that has clung to it since the days of the late Sir Eric Miller. Peachey intends to sell the last of its residential property portfolio over the next two years to

from a low-yielding residential property company to one set on income growth from the keen management of a com-mercial portfolio. Reinvestment is the key to

Peachey's future, with profits from its residential sales going to the purchase of retail and office property or into com-panies with portfolios showing potential through Peachey's

management abilities. Peachey sold two tranches of residential property for more than £2m each last year and now has only 600 homes left, mostly in the south east and home counties. These will also be sold over the next two years, leaving a gap in the company's profits which it will try hard to close. Residential property now only accounts for £10m of the £121m portfolio.

The results for the year are above most brokers' predictions, with net asset value up to 304p per share from 269p. Predictions centred around the 290 figure. The property valuation carried out for the financial year saw a 10 per cent rise producing a surplus of £10m. This was an overall average, in fact the Carnaby Street properties acquired in June last year saw an increase above that level. Carnaby Street contributed £1m to the net rental income of £6.73m. a rise of 27 per cent on the year before. The company has also let its 40,000 sq ft office block, Standon House, in the City.

Peachey looks to the retail market and the potential of its Carnaby Street estate to pro-vide rental growth in the next few years, something that will be essential once the trading from residential sales cease.

Mr K. Knowles

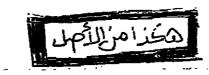

The gilts market was saddened yesterday to learn of the death of Mr Keith Knowles, 55, formerly Union Discount's gilt trading manager.

Mr Knowles, who retired

from Union on health grounds last December, was renowned throughout the gilts market for his charm and unfailing cheer-

He joined Union from a small jobbing firm in 1966 and was known and trusted throughout the stockbroking community. He will be sadly

ROYAL MAIL SERVICES FOR BUSINESS ECONOMY

Help your customers pay more quickly!

When you enclose a Business Reply envelope with your bill-First or Second Class - it's much easier for your customers to pay.

Which means they can pay more quickly - and your cash flow

will improve.

A TARE

For example: if you received a payment of £500 two days earlier because of a reply-paid envelope - and if that £500 were deposited at 10% interest - you'd more than cover the cost of the reply-paid service within those two days!

There's a FREE Business Economy Reckoner available from the

Royal Mail to help you plan such savings.

It's just one of the many Royal Mail Services for Business Economy

- all designed to adapt readily to the particular needs of companies like yours.

Forfurtherinformation and to obtain your free Reckoner, send this coupon.

Results and Prospects

The improvement reported in the second half of 1983 has continued in this period. Whilst in most recent years the results in the second half of the year have been considerably in excess of the first half, an approximately even pattern has emerged in 1984 to date.

The Plantation Division has benefited from continued good crops and favourable prices. The subsequent weakening of some produce prices in the current period has been offset by

The better profits previously reported from Chemical

manufacturing and distribution units in the UK and Europe have been maintained and the outlook is promising. Margins are still a problem in North America but sales are higher.

Timber and Building Supplies marginally improved upon the good results in the first half of 1983 but the remainder of 1984 may reflect the reduction in housing starts and the generally lower levels of activity of the building industry.

The commodity sections of the General Trading Division continue to perform well but recessionary conditions still affect the Eastern companies. The outlook is similar.

ECONOMIC COMMENTARY)

The miners' way of distribution

By Tim Congdon

How the pit strike has shaken Britain's indifference to big political questions

The British have never liked abstract economic or political ideas, and have tended to take their peaceful way of life for

If there is anything to be said in favour of the miners' strike, it is that people have been shaken out of their indifference to large political questions and they have been made to think harder about the sources of Britain's past stability.

The dispute has also given new topicality to the old debate among economists about whether incomes are determined by power or pro-ductivity. Although the strike is ostensibly about the profit-andloss position of uneconomic it is in fact about the distribution of power in society.

The Government can only subsidize coal by taxing other people

Uneconomic pits can remain in production only with the aid of government subsidies. If it were to become accepted that uneconomic pits can survive indefinately. government money would have to be made available on an ever increasing

But there is no such thing as "government money". The government produces and sells nothing itself; it merely levies taxes and spends them. The only way that the government can subsidize miners is by taxing other people.

But why should other people

mindedness, what is to stop every union and every interest group being equally selfish and anti-social? If the Government rewards violence on one occasion, there is an incentive to violence in all future industrial

The result will be a society in which the organization of large and disruptive riots becomes the simplest means of acquiring wealth. The more vicious the riot and the more publicity it receives, the greater the bribe which the rest of the com-munity will hand over for the sake of (temporary) peace and

This may sound exaggerated. but there are many countries where the sectoral distribution of income is determined by processes as perverse and despicable as these. In most of Africa, governments hold down food prices, impoverishing farmers, to prevent riots by the urban population.

Perhaps more interesting. because incomes are closer to European levels, are the many Latin American countries where access to cheap central bank credit is the recognized reward for deliberate and successful civil insubordination. The most pathetic case today is Argentina where "government money", mostly issuing from the printing presses rather than covered by tax revenues, has lost all credibility and hyperinflation is an imminent prospect.

In these circumstances the connexion between input and output, between effort and reward, is severed completely. Income distribution is determined by power or, more accurately, by the relative effectiveness of the various gangsters who call themselves prime ministers, central bank governors, police chiefs and so

If the Government were to concede endless subsidies to the National Coal Board's uneconomic pits, Britain would have taken the first steps towards this sort of mess. Mr Scargill makes If they see the miners no secret that it is his intention grabbing more by sheer bloody- to achieve just such an out-

ution (or whatever) he would become head of the politburo profitable and ensure that such gangsterism (relabelled "socialist planning") would be conducted on

All this may sound far-fetched. But there is an influential strand in economic thought, essentially Marxist in origin. which claims that in every society - including advanced nations like Britain - income distribution depends on the bargaining strength of different groups and, more particularly, on the degree of union mili-

In most of Africa governments hold down food prices to prevent riots

Set against this view is another line of argument, that wages and profits depend on the contribution that labour and capital make to the production process. This contribution is measured by the change in output attributable to a unit change in the amount of labour or capital employed (termed 'marginal productivity").

The disagreements between the power and productivity theories of income distribution have a high political content. Marginal productivity economists are generally satisfied with the existing social order.

Private sector companies keep only profitable activities alive

Their point is that marginal productivity does identify and emphasize the connexion between input and output. They helieve in supply and demand. and in most circumstances are in favour of closing down lossmaking forms of production. In a free market economy

come, presumably confident closed down without any special that after the proletarian revolution. Private activities operation.

> Not surprisingly, therefore, marginal productivity theorists tend to prefer private property to state ownership. Disputes between property-owners need to be settled within a sound legal framework and so they are also defenders of the rule of law. There is an obvious link with one of Mrs Thatcher's themes in her speech to the Conserva-tive Party conference.

> Economists who criticize the marginal productivity approach do so on two grounds. Their first objection is that the theory is an inaccurate discription of the real world. Secondly, and more fundamentally, they think that the theory is used as an apology for an unfair and inequitable pattern of income

In some respects, these criticisms are difficult to resist. Many large fortunes are the result of inheritance, speculation and gambling. It is not clear that marginal productivity goes far to explaining the value of the Duke of Westminster's estate or is a clue to the successful pursuit of bingo.

But in the last few months the argument has been pushed too far. The rule of law, private property and the market economy are related, but it does not follow - as Mr Scargill seems to believe - that all lawyers are biased against people without property or, indeed, that they necessarily support the prevailing balance of power and influence between the Government, the NCB and the National Union of Minework-

The most charitable, and probably not altogether misleading characterization of his motives is that he thinks a different distribution of political power would lead to a more "socially just" distribution of material well-being.

But societies where political power is the main determinant of income distribution are not a dominated by private property. Scargill's case, the depressing broduction is lesson of so many countries in good advertisement for Mr

Eastern Europe is that, once the sector companies keep only rule of law is suspended, the distribution of incomes does not correspond more closely to the canons of "social justice". Instead, it becomes more arbitrary, more unfair and, quite ofien, more unequal,

The market economy has its problems. Perhaps market forces are impersonal and harsh, and perhaps the Duke of Westminster does not deserve to be so wealthy. But at least in a market economy most people are paid on the basis that there is a demand for what they produce and that, if they produce more, they will be paid

Is there any social justice in relating incomes to the aggressiveness of trade union leaders? Should an individual benefit because he belongs to the most violent, noisy and powerful trade union? And does not the unhappy experience of numerous developing countries indicate that the most violent and powerful trade union is ultimately the army?

Is there justice in relating incomes to trade union aggressiveness?

At Brighton last week, there were occasional references to great Conservative thinkers from the past. The Third Marquess of Salisbury, prime minister from 1886 to 1892 and again from 1895 to 1902, has never been a favourite in the pantheon, but this year he ought to have been.

In his famous essay on "Disintegration" published in the Quarter!y Review of 1883, he suggested that "the broad distinction between a civilized and uncivilized community is this - that in a civilized community individuals or bodies of men who quarrel submit their difference to an arbitrator, while in a savage state they fight it out".

The remark is as relevant today as it was a hundred years

Scargill's case. The depressing The author is economics partner at stockbrokers L. Messel & Co.

APPOINTMENTS

Birkin steps up

Rio Tinto Zinc-Corporation: Mr J. D. Birkin, deputy chief executive, becomes deputy chairman and chief executive from April 1, 1985.

Burmah Speciality Chemicals: Dr Brian Ridgewell joins the board as chief executive of its coatings division. He takes over from Mr Toby Green who has retired.

Canvermoor: Mr R. G. Newberry and Mr K. C. Roberts becomes non-executive direc-

Baronsmead Associates: Mr inthony Shoebridge joins the board.

Feedex Agricultural Indus-tries: Mr John Robson becomes managing director.

Storno: Mr L. A. Edwards, hairman, takes over as managing director from Mr Bernard Flashman who becomes respon sible to Mr Edwards for special assignments. Mr Bjorn Lin dgren has been named technical and operations director.

Scottish Daily Record & Sunday Mail: Mr Colin McC-latchie becomes circulation director and Mr Gordon B. Terris has been appointed as advertisement director.

Liberty Life Group: Mr J. M. Middlemas leaves the partnership of Touche Ross & Co on December 31, to take up a enior appointment with the Liberty Life Group. He becomes an executive director of

Liberty Holdings. Mono Pumps (UK): Mr K W. Boddington has been appointed managing director. Midland Bank: Mr Alan

Eastwood, former chief inspector. Midland Bank, has been appointed regional director, East Midlands. He succeeds Mr John Roberts, who becomes chief executive, Northern Bank.

George Wimpey: Mr A. M. Coane retires as managing director Wimpey Construction United Kingdom at the end of the year. Mr J. A. Dwyer, a director of the company, succeeds him, and retains his responsibilities as chairman of Wimpey Asphalt.

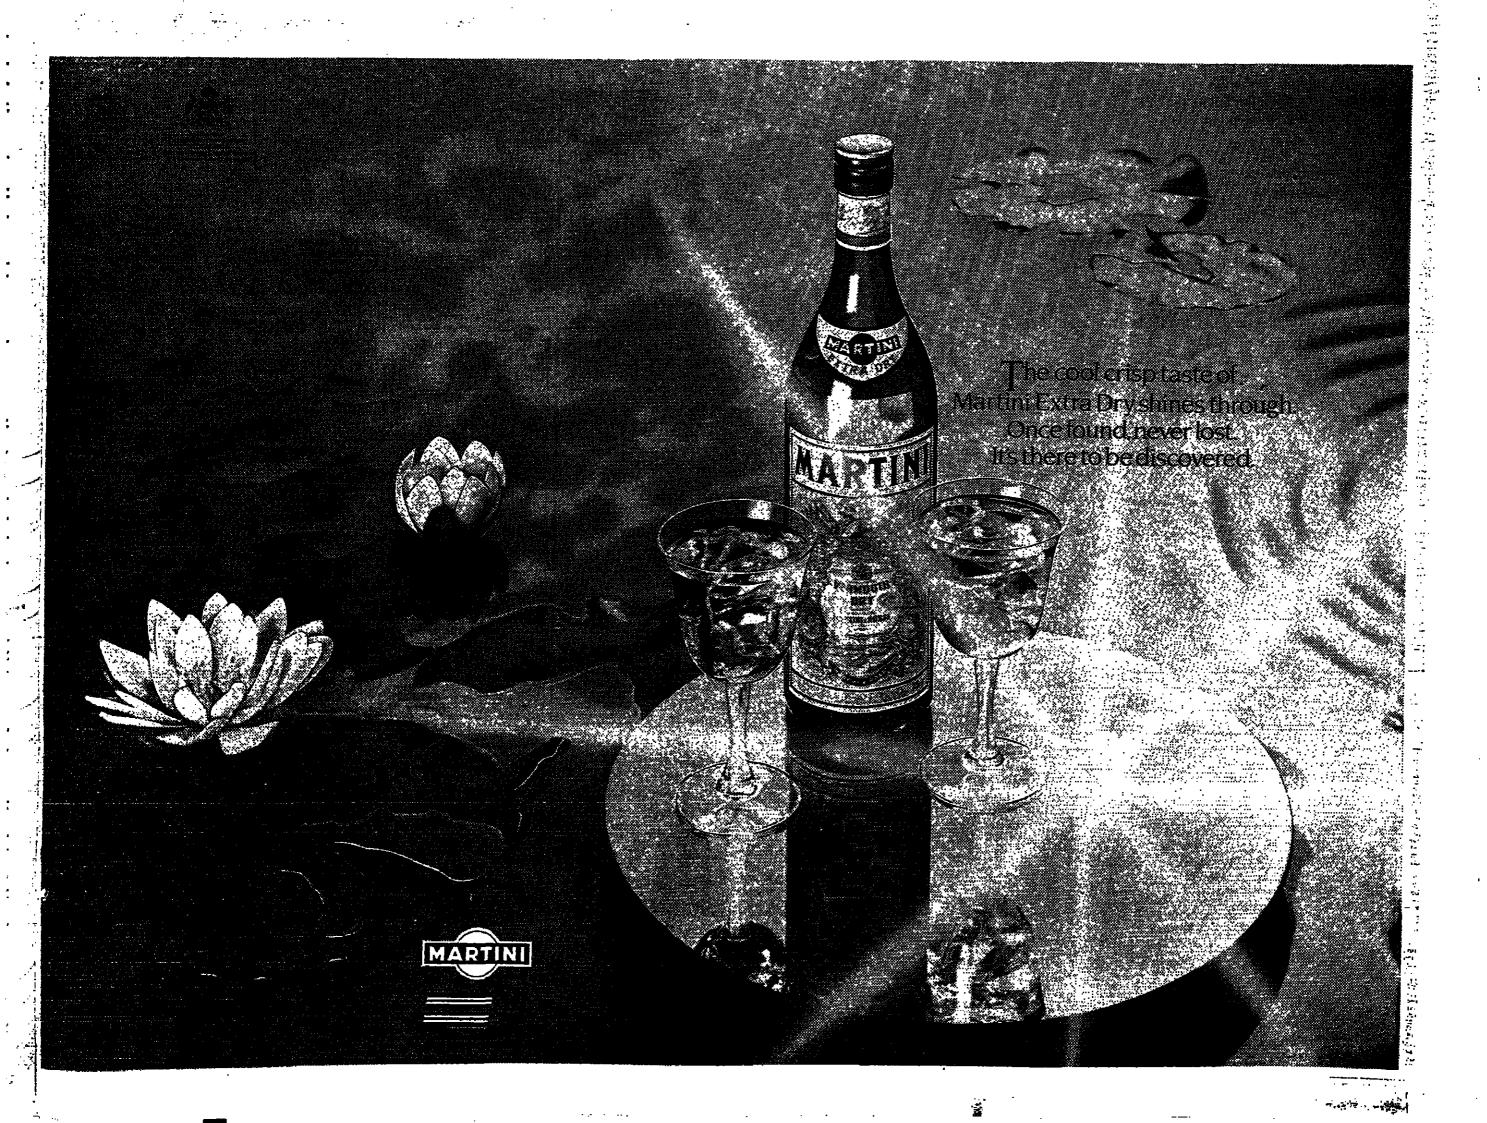

Baker & McKenzie: Mr Michael Caro and Mr Michael Smith have been admitted to the partnership.
Brownlee: Mr W. David P.

Walker joins the board.

Minister failed to make due inquiry

Before Lord Justice Lawton, Lord Justice Griffiths and Lord Justice

[Reasons delivered October 16] The Secretary of State of Transport, when exercising his powers under article 59 of the Air Navigation Order (SI 1980 No 1965) which gave him power severely to curtail the operations of an airline, had to give that airline an opportunity of answering any opportunity of answering any allegations made against them since such an opportunity was essential for the "due inquiry" required by

As no such opportunity was afforded to Philippine Airlines Inc (PAL) when the secretary of state decided that their operating permit for flights between Manila and London should be varied from three times. times a week to two his decision was vitiated by the absence of due

The Court of Appeal gave their The Court of Appeal gave their reasons for allowing, on July 26, Lord Justice Dillon dissenting, an appeal by PAL from the refusal by Mr Justice McNeil of their application for an order quashing the secretary of state's decision permanently to vary the airline's operating permit dated June 18, 1981, and refusing a declaration that the variation was ultra vires the powers of the secretary of state and/or invalid.

Mr Denis Henry, QC and Mr Bruce Coles for the airline, Mr David Donaldson, QC and Mr Stephen Aitchison for the secretary of state.

LORD JUSTICE LAWTON said that on June 18, 1981 the secretary of state pursuant to article 80 of the Air Navigation Order 1980 granted permission to PAL to operate three rvices a week between Manila and London in each direction. All through 1981, 1982 and 1983 PAL only operated two services a week.
During 1982-1983 the Office of
Population, Censuses and Surveys
carried out a survey of PAL's traffic
figures. It was done by a sampling

As a way of linding out where PAL's passengers arriving at Catwick had come from it might. have been adequate; but as a way of finding out what was the pattern of traffic on PAL's Manila-London route it was inadequate because it did not reveal how much traffic was taken on and put down at Manila (known in the airline business as third and fourth freedom traffic) and what traffic was picked up on route from Manila without reaching London (fifth freedom traffic).

The sample did reveal that PAL

The samples did reveal that PAL were carrying a substantial number of passengers who had started their journeys in Australia. New Zealand journeys in Australia. New Zealand and Hongkong. If those passengers had at Manila changed from one incoming plane to a London-bound one they would have been sixth freedom traffic but if they had stayed in Manila for one or more nights they would have counted as third and fourth freedom traffic.

In June 1983 the International Aviation Directorate of the Department of Transport (the directorate) said the PAL's services appeared to be excessive in terms of article 6(3) of the Air Services Agreement (ASA).

That provided that passenger capacity should be related to (a) raffic requirements to and from th territory of the contracting party which had designated the airline: (b) traffic requirements of the areas through which the airline passed. after taking account of other transport services established by airlines of the states comprising the area: and (c) the requirements of through airline operations.

The directorate did not seem to have appreciated before spring 1984 that the sampling figures were incapable of showing whether PAL's services conformed with article 6(3). In autumn 1983 PAL decided to increase their Manila-London services to three a week for summer 1984.

in December 1983 the directorate learned of PAL's plan. In January 1984 the directorate alleged to the Philippine Civil Aeronautic Board (P-CAB) that PAL had been operating in violation of article 6(3) of the ASA and condition 4(h) of their nermit their permit.
What was disturbing the director-

what was disturbing the directorate was sixth-freedom traffic originating in Australia. Figures were produced which seemed to have resulted from the sampling procedure. It was said that HM Government could not grant PAL permission to operate a third service.

permission to operate a service.

The P-CAB did not accept the complaints made against PAL.

By letter of January 31, the directorate gave notice that PAL's existing operating permit would be revoked from March 2, 1984 and a revised permit for two services a week would be issued. The reason was that PAL were operating in contravention of the ASA.

At the end of February PAL's solicitors asked the secretary of state to withdraw the revocation of PAL's permit. The directorate, still relying on the sampling figures and convinced of the soundness of their

on the sampling figures and convinced of the soundness of their complaints, advised the secretary of state to vary provisionally PAL's existing permit to confine them to two services a week. A decision letter to that effect was sent to PAL's

Loadon office.

PAL applied for judicial review.

Mr Justice McNeill who heard the application on April 13, 1984 adjudged (The Times April 24) that the secretary of state's provisional variation of PAL's permit should be supplied on the ground that he had ished on the ground that he had failed to recognize as fundamental the question whether or not the ASA imposed any obligations on PAL under UK domestic law for the purposes of the 1980 Order and, in failing to recognize the question, failed to consider it.

In his Lordship's judgment the provisional variation could have

provisional variation could have been quashed on another ground, namely, that in relying on imperfect figures which were inaccurate and unreliable the secretary of state had taken into account facts which ought not to have been taken into account.

On May II. 1984 the secretary of On May II. 1984 the secretary of state made another provisional variation in the same terms as the one which had been quashed. In his decision letter he set out the material he had taken into account which seemed still to have included the inaccurate and unreliable figures PAL applied for judicial review of that decision which Mr Justice McNeill refused on June 1 PAL appealed to the Court of Appeal.

When the appeal was called on July 23 the court was informed that the secretary of state had decided

Regina v Secretary of State for permanently to vary PAL's permit to two services a week but had desisted from doing so out of courtesy to the court. He invited the court to deliver an advisory

court to deliver an advisory judgment, but the court declined.

After a short adjournment the court was informed that the secretary of state had made the permanent variation, that PAL had unsuccessfully applied to Mr Justice McNeill for judicial review, that with the consent of both parties the judge had waived all time requirements and that the appeal against the permanent variation could be heard forthwith. The court decided

to hear the appeal.
In his decision letter dated July 23 the secretary of state said that he had completed his inquiry into and consideration of the question whether he should permanently vary PAL's operating permit. He had had before him the relevant correspondence, the documents relations had before him the relevant correspondence. relating to the consultations held under the ASA and those in the

court proceedings.

He had formed the view that the He had formed the view that the pattern of traffic on the London – Manila service operated by PAL involved the carriage of a substantial quantity of traffic not truly originating from or destined for Manila and that the quantity of traffic originating from or destined for Manila did not justify any additional capacity beyond the two frequencies PAL had operated. In reaching that view he had fully

In reaching that view he had fully considered the statistical material considered the statistical material and the representations made thereon in the court proceedings. Further it was his view that the pattern of traffic on PAL's service was not in conformity with that envisaged in article 6(3) of the ASA. PAL appealed on three grounds:

[Fig. that the recreative of state had

first that the secretary of state had failed to comply with article 59(1) of the 1980 Order in that he had permanently varied the permit without making "due inquiry": second, that on the evidence available no secretary of state could avanance in secretary of state there were sufficient grounds for variation; and third, even if the secretary of state had been entitled to make the variation, he had acted unfairly in failing to give PAL a reasonable time in which to make

reasonable time in which to make arrangements for winding up the service they had planned.

While Mr Henry was making his submissions, Mr Donaldson learned that in the course of the discussions referred it in the decision letter PAL had produced what seemed to be full and accurate traffic figures together with figures showing the kind of fares paid by passengers passing through Manila from or to

proportion between one fifth and one third, had been taken up by passengers from the areas through which PAL's services had passed but without reaching London.

About three questions of PAL's

but without reaching London.

About 'three-quarters of PAL's traffic, in his Lordship's judgment, was clearly in conformity with what was envisaged in article 5(3).

The revised and detailed figures produced by PAL showed for the first time what was the proportion of transit traffic as a whole, where it

had originated and how much of it was made up by passengers paying promotional fares and to whom PAL had unrestricted access. The secretary of state thought it

was too large a proportion. Maybe he was justified in being of that opinion; but in basing his decision on that ground, he was looking at the issue from a different standpoint from that which he had taken up when making his provisional variations. He did not tell PAL what he had in mind and gave them no opportunity of commenting on the traffic pattern which the revised figures revealed.

miling

M-SONQ

Mr Henry submitted that he made his decision without due inquiry as required by article 59(1) of the 1980 Order.

What was "due inquiry"? The inquiry might take many forms depending on the nature of the case; but whatever form it took it had to be fair. Article 59(1) gave the secretary of state power severely to curtail the operations of an airline. He had to have sufficient grounds

for exercising his powers. He could not know if he had sufficient grounds if he did not give the airline into whose activities he was inquiring an opportunity of answer-ing any allegations. That oppor-tunity of answering was essential for a due inquiry under article 59(1).

Such an opportunity was not afforded to PAL when the secretary of state decided that their permit should be varied because in his opinion the traffic on the London-Manila route involved the carriage of a substantial quantity of traffic not truly originating from or destined for Manila.

It was particularly important that PAL should have been given an opportunity of commenting on the secretary of state's new approach since his first one had been misconceived. His omission was taken to consider that the ikely to create a suspicion that he was finding new reasons for supporting an earlier decision which had been based on faulty grounds. In his Lordship's judgment the bsence of "due inquiry" before

making the permanent variations vittated the decision of July 23,

Lord Justice Griffiths delivered a judgment concurring with Lord Justice Lawton.

LORD JUSTICE DILLON, dissenting said that the permanent variation of PAL's operating permit cliected by the secretary of state could, under article 59(1) of the 1980 Order only be made by the secretary of state "after due inquiry" and "on sufficient ground being shown to (his) satisfaction"

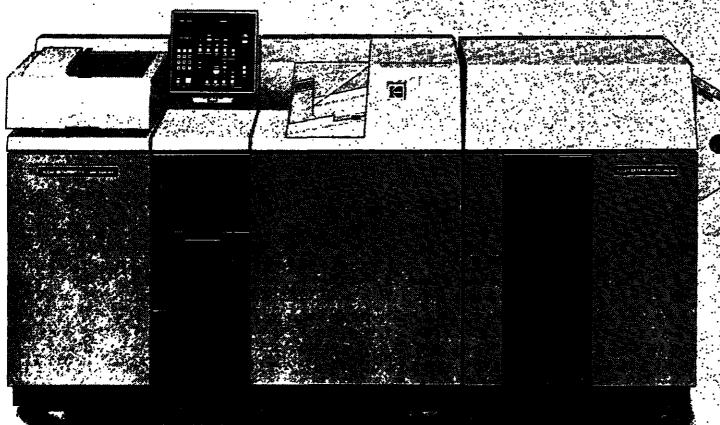

It had been suggested that the secretary of state had not made "due inquiry". His Lordship was unable to accept that,

It became clear during the hearing that the secretary of state had obtained from PAL detailed figures of the extent of the sixth freedom traffic carried by PAL (in either direction) between Manila and each of the intermediate stops on the Manila-London route. That was the one gap in the picture which was now complete.

His Lordship could not think that there was any further inquiry which the secretary of state ought to have made, or any further fact which ought to have been elicited.

He would dismiss the appeal. Solicitors: Slaughter & May: Treasury Solicitor.

Kodak have just taken the next step in copying.

The new KODAK 'Ektaprint' 200' Copier-Diplicator has been designed to save you time. To start with, you can pre-programme it. So regular or difficult jobs,

like making a professional report, can be done at the touch of a button. Ease of operation is another in-built feature. Comprehensive messages appear on the display unit. They tell the user, in plain English, exactly what's going on.

We won't spend any more time telling you about the Model 200. To find out more about Kodak's next step in copying, fill in the coupon now.

Weakened Belgium in the dark

Brussels (Reuter) - Belgium step into the unknown when they open their 1986 World Cup campaign against Albania here today The Albanians are an unknown quantity at this level, and that, coupled with Guy Thys' selection worries, could pose problems for the Belgians.

Injuries and suspensions have wreaked havoc with the manager's squad and with Poland as their main Group One rivals. Belgium cannot afford to slip up on home soil, even though Albania's international record makes dismal reading. They have won only one of the 16 internationals they have played since 1980, but they did give West Germany a scare in the European Championship while their under-21 side was a revelation in

their equivalent competition. Five of that under-21 squad have gained promption to the seniors. Although Belgium will be without Plaff. Clysters. Coulemans and Vanderbergh, all out with injury, they are able to recall the veteran defender, Renguin, to play alongplayer in the learn. As usual Anderlecht, will provide the backbone of the side with six

representatives. Poland start clear favourites against Greece in their opening qualifying match in Zabrze. The poles beat Finland and

go on bubbling over

The West Ham Story, as told by John Moynihan (Arthur Barker, £6.95), is a story of a club united both by name and by the affectionate loyalty of their East Loudon

Springing from a Thanesside accestry - the amateur Thanesside lronworks FC - the effective founding father was an Old Harrovian, Arnold Hills, owner of a successful waterside shipbuilding company. It was this Victorian capitalist's entinsiasm, in the wake of nineteenth-century muscular Christianity, that set the ball rolling Caristianny, that set the ball rolling among his workmen in 1895. A Corinthian amateur at heart, he soon found a spacious home in 1897 for his fledgling amateurs at the Memorial Recreation Ground in the

That proved an eventual parting of the ways. The ambitious original Thameside and Ironworks FC began to harbour ideas of professionalism which struck at the heart of Hills's which struck at the heart of Hills's amateurism. So a split was widened. The amateur element stayed on at the Memorial Ground while the opposition departed in 1904 to find their own future.

With the loss of Hills's private financial support. West Ham United Company Ltd came into existence on

raised with an issue of 10-shilling shares. By 1919 the new club had stepped out of the Southern League to be elected to the second division of the Football League, having ac-quired a new playing pitch at the Boleyn Ground, a name derived from a nearby house called Boleyn Castle, built in 1544 and connected with Anne. West Ham's home has come to be known as Upton Park, but that in fact is the name of the district. Strictly speaking, it still remains the

warmth and affection by a man who has trod a well-worn path to this East End temple for the past two decades. I'm forever Blowing Bubbles was top of the pops in the 1920s and was adopted by the Hammers' loyal fans when the club played their historic part in Wembley's first Cup Final of 1923. warmth and affection by a man who a verson which also saw the club win remotion to the first division.

until dawn's early light.

Byrne: talented

captain; and that most graceful of forwards, just retired, "Gentleman"

In recent years opponents have enjoyed facing West Ham with their their players turning to management on retirement — men like Frank O'Farrell, Noel Cantwell, the notorious Malcolm Allison, John Bond, Ken Browne, Moore, Hurst, The Kearus family, four of whom sit on the board of directors, and the

managers since the turn of the century - Sid King, Charife Paynter, Fenton, Ron Greenwood (the only one not to have worn the claret-and-blue shirt) and the reigning John Lyall - together underline the sense of loyalty and continuity that pervades West Ham United.

Three Sunderland players have been suspended after being sent off in a friendly match in Sweden two weeks ago. Venison, the England Under-21 defender, and the teenager. Lemon, miss the game against Luton on October 27. Walker, dismissed for violent conduct received a two-match ban.

Sunera verdict

after appearing to hamper the runner-up was overruled at a lockey Club inquiry yesterday. Connexions of the second horse. Storm Warning, had appealed against the stewards decision, which followed the Bloodstock and General Nursery on Orches 4.

October 4. The incident occurred before the last furlong of the race when Sunera, under strong driving from Bruce. Raymond, hung badly to the left, appearing to interfere with Storm Warning. Steve Cauthen's mount dropped back to seventh place, but got going again and finished well to take second place, two lengths second place, two lengths behind the winner.

Same again for **Grand National** John Hughes, Aintree's clerk of

the course, has confirmed that conditions for next year's Grand National will remain imaligned, Pational will remain trialized, flis means that any horse of six years of age and upwards — which has won a chase in any recognized country, or been placed first, second third or fourth in the Maryland Hunt (up before January 13, 1983 and since July 1, 1982 — will be eligible for the four and a half mile race on Saturday March 30. mile race on Saturday, March 30. National entries close on January

and the weights will be published on January 30.

The controversial decison by the learning my lewmarker stewards to allow ground", but the local stewards trankie-Dury's Smera to keep a race allowed the result to stand. At yesterday's enquiry, which lasted two hours, the disciplinary committee heard evidence from Storm Warning's trainer, Willie Hastings-Bass, and Cauthen, both of whom were legally represented; Auchen Wates, a steward of the meeting; the stewards' secretary: Bruce Raymond and George Ennor, a journalist. After watching a video recording

of the race, they found that Sunera had interfered with Storm Warning. but were satisfied that it was accidental. They placed Storm Warning first and Sunera second.
Cauthen said: "That's the first winner I've had in London. I was surprised not to get the race at Newmarket, but at an inquiry everything happens very quickly. Having seen everything on the bigger screen today, and after taking much more time, they could see we

Hastings-Bas added: "The result of the group three Cornwallis Stakes at Ascot on Saturday, when Storm Warning was beaten less than a length into fourth place, suggested that the Newmarket result was

wrong.
Storm Warning's owner. Klaus
Fischer, now collects the £5,835 first At an earlier hearing, the commutee fined Elie Lambert. a Belgian bloodstock agent. £250 for buying a horse out of a seller while on the forfeit list.

Tolomeo at **National** Stud for one season

Tolomeo, winner of the 1983 Budweiser Million in Chicago, will stand next season at the National Stud in Newmarket before leaving for Australia. The four-year-old, trained by Luca Cumani, has been one of the most consistent horses in top-class events over the past two years, although the Chicago race was

his only important success.

Two of his best efforts were his second to Lomond in last season's 2,000 Guineas and his third to Teenoso in the King George VI and Queen Elizabeth Diamond Stakes this July. He makes what is likely to be his farewell racecourse appear-Newmarket on Saturday.

Tolomeo was bought in a multi-

million dollar deal masterminded by Percy Sykes, a Syncy-based vet. m August and will eventually take mach last month.

Luca Cumani, trainer of Tolomeo

up stallion duties in New South Wales, He will stand for the 1985 covering season at a fee of £20,000 and will be restricted to 30 mares. The deal is a timely boost for the National Stud, who sold the Derby winner. Grundy, to Japan last year, then lost the champion sprinter, Moorestyle, with a ruptured sto-

RUGBY UNION: VISITING WALLABIES FACE THEIR FIRST CHALLENGE ON THE FIELD

Australians seek understanding as pre-tour talk is put to test

By David Hands, Rugby Correspondent

not play a match) begins its programme at Twickenham today. There have been many words spoken and written about what they might or might not achieve but expectations should not run too high before the game against the London division, the first 18 matches.

The Australians go into the game without Slack, their captian, and with a mixture of experience and promising youth which, however hard the players may have worked in training requires the essential test of match conditions. They will be looking for a victory of any kind to begin the tour.

That proved beyond the last Australian visitors, in 1981. They lost their first game to the Midlands and could only manage a win, a draw and a second defeat in the next three. With the first international looming on November 3, there is all too little time for Slack's Wallabies to establish their most effective combination, and London, who have pre-pared long and hard for the game, are not going to help

The first match of a tour is always one in which the home team fancies its chances, and London very nearly did the trick against the 1979 New Zealanders, losing by three points. This year they have been unlucky to have three of their original selections injured; they are left with six internationals, including the captain, Colclough, whose form wil be closely watched by the England selectors.

season suffering somewhat from disenchantment with the international game, decided to restrict his activities to club rugby. But, at 31, he remains a powerful force and England desperately need a tight forward of his ability and experience. A good game today may herald his return to the international

The lineout is said to be one of the Australians' main strengths; another is the pace of their backs and the quality of their handling. They have had firm surfaces for training and

Sponsorship for amateur Rugby

West Yorkshire

League in Yorkshire has come from an unexpected source - local

County Council are to sponsor the

Yorkshire Amateur Rugby League to a total of £5,000 for the rest of

this season. The money will be used to pay for trophies, an end-of-season

presentation night, and to stage trophy finals in the league's three sections: youth, junior and open age. Sponsorship of candidates on

the national coaching course is also

John Gunnell, the council leader.

said that this was the first sponsorship of its kind. "Thanks to

the efforts in recent years of the British Amateur Rugby League Association, the sport has grown rapidly, not just here in Yorkshire

but throughout the country," he said. "It is appropriate that we

should strengthen our links with the county's rich sporting traditions." The amateur game continues to thrive elsewhere. This week 29 clubs, including entries from Wales

The seventh major touring side from Australia to this country (the eighth, counting the ill fated 1939 party, who did not play a match) begins its will be able to attend.

The South and South West division have lost their left wing for the second tour game at Exeter on Saturday. Mogg, of Gloucester, has dropped out with damaged knee ligaments and his place goes to Swift, the Swansea wing, who has six caps. There will be fitness checks for Hesford and Spurrell tomorrow

The Teams

LONDON DIVISION: N Stringer (Wasps);
S Smith (Wasps), A Thompson (Harisquins), R Lozowski, R Cardus; H Davies (all Wasps), I George (London Welsh); P Curtiss (Harisquins), A Simmons (Wasps), S Henderson (Rosslyn Park), K Mogg (Wasps), M Coiclough (Wasps, captain), P Ackford (Metropolitan Police), D Cooke (Harisquins) C Butcher (Harisquins) Replacements: J Salmon (Harisquins), S Smith (Richmond), A Woodhouse (Harisquins), A Riphiry (Rosslyn Park).
A Riphiry (Rosslyn Park).
AUSTRALIANS: R Goudd; D Campese, M Burk, J Black, B Moon; M Elia, N Farr-Jones; C Lifficrap, T Lawton, A Micintyre, W Calerat, S Williams (captain), W Campball, S Poldsvin, R Reynolds. Replacements: R Hanley, M Lynagh, P Cox, M McBaln, E Rockigue, S Tuymman.
Referee: S Hiddicht (Ireland).

 Colclough and Nigel Melville make their first senior appearance for Wasps this season in the merit table match against London Irish on Satur-

Melville's slow recovery from injury and commitments to Yorkshire have prevented him teaming up with Huw Davies at half back, and he was his first game in the senior side since playing at Llanelli last January. Colclough has played six games for Portiers in the French second division, but his absence

from Wasps' training has, under

the club rules, confined him to three second XV matches.

Trip for Cardiff

Cardiff, the holders, visit village side Tonyrefail in the first round of the 1984-5 Welsh Rugby Union Challenge Cup, sponsored by Schwerpes, on Saturday, November 17

November 17.
Neath, last season's beaten finalists, are at home to Colwyn Bay, while Pontypool, this season's only unbeaten senior Welsh club, travel to Carmarthen Athletic.

Colclough: possible return to international fray

Cambridge change to avoid clash

Cambridge University and M. Steele-Bodger's XV has been brought forward a week from November 28 to November 21 to Aveid a clash with the game at waterloo between the Northern Division and the Australians (David Hands writes). Cambridge have four players who may be considered for the North.

The move means that both Oxford and Cambridge universities will have their invitation games on the same day - Oxford meet R. V. Stanley's XV. Traditionally each university has "spied" on the other at these games.

at these games. Cambridge have complied with a request from England's selectors to release their players for divisional rugby and will therefore be missing Andrew, Simms and Ellison in their game with Rosslyn Park this evening.

The three will be playing for the North against Ulster, so Hastings, the Scotland B full back, remains at stand-off half, and Martin, last year's full back at Twickenham, comes in for the first game of the term after recovering from a learn after terms at least term. term after recovering from a leg

Five new faces go to Belfast

The North have had to make five changes for their match against Ulster in Belfast tonight. Ruled on orser in Benast tonight, knied out are the England centre, Bryan barley, the flank forward, Peter Winterbottom, and the prop forward, Eddie Bell. Also Missing are Wayne Dooley, of Lancashire, and the Yorkshire wing Mike

The Gosforth wing, Paul Cusack, is drafted in along with Orrell's Bob Kimmins at lock, the Headingley prop, Paul Huntsman, Liverpool's Peter Buckton in the back row and the centre, Andy Mason, of

. The England forward, Nick Jeavons, Misses Moseley's home match against Aberabon on Saturday because of a business trip abroad. George Sey has recovered from a groin strain and fills the vacancy at flank forward Cambridge University will be

without four Blues when they open their first-class fixture list against Rosslynb Park at Rowhampton this evening. Rob Andrew, John Ellison and Kevin Simms are playing for the North against Ulster while Mark Bailey, the captain, is recovering from a foot injury.

BOXING

Seedy gym that is the home of champions Mexico City (Reuter) - In a

run-down district of the Mexican capital, amid the stray dogs, food stalls and bare foot, ragge children, stands the home of Mexico's world boxing champions - a scruffy upstairs gym called the Lupita Baths.

Taco and chili fumes rise from the street and blend with the sweat of dozens of short, dark, mean-looking men who seem to revel in the seediness of the place.

Boxing experts here find hard to pinpoint the particular appeal of Lupita - motto: "Order, respect and harmony." - or of the string of equally shabby gyms in the thieves kitchen neighbourhood o

After all, world champions can chose not to use old bleach train in such cramped surroundings; but dozens of the country's top boxers nevertheless gravitate towards the place, perhaps because of its steamy, pungent atmosphere.

Gabriel Bernal, who lost his World Boxing Council (WBC) flyweight title to Thailand's Sot Chitalada in Bangkok last week is one big name who works out there.

Bernal's manager, Arturo
Hernandez, affectionately

Hernandez, affectionately known as "The Weasel", said before the bout that his man's preparation should have been more thorough, and Bernal agreed that the bout will be difficult. How right they were. Another boxer who takes his place in the practice ring there is Lupe Pintor, the WBC bantamweight champion, while the Nicaraguan former world champion, Alexis Arguello, and Mexicans such as Julio Cesar Chavez, Ruben Olivares, German Torres, Juan Meza, Jose Napoles and Salvador Sanchez, have sparred there at one time

or another.
"Mexican boxers come from the streets", the WBC president, Jose Sulaiman, says. "They are tough and they fight to survive. The gymnasia here reflect that attitude.

Sulamiman believed Mexico consistently produces world boxing champions because there is so much poverty and hunger in the country, and boxing is the traditional escape

Top-of-the-bill Price Jimmy Price, the London-based

Gymnast makes a resounding success of her second love

Amateurs sponsored Dancer who swapped her shoes for title

a British gynamast in the post-war Olympic Games - nineteenth in the overall finals.

The move towards exchanging art for sport began at primary school in Orpington when Miss Davies was six. A teacher was convinced that she had the physique, co-ordination and courage to suit the many demanding facets of gynmastics.

Miss Davies was introduced to the local Cray Valley crab, where she has trained ever since under the inspiration and guidance of the club's founder, Joyce Macaulay, who says: "With her alim build and long legs, Natalie cortainly has the right body shape for the sport. But she was also a hard worker and a perfectionist with a touch of impatience — which is always an advantage."

The appeal of the dance conflicted with the satisfaction of gynmastics until 1980, when Miss Davies achieved a Daily Mirror scholarship to the Soviet Union, where she trained with two top coaches, Violenir Gurina and Mikhael

The majority of the work will be transcription of audio tapes, and the operation of word. processors in English and French, although a good knowledge of German is essential for integration into the office environment. Salary, benefits and social facilities are of the

standard you would expect from a major international company, and include holiday supplement and profit sharing. Interviews will be held near London.

For further details and an application form, contact: Susan Dove, Personnel Unit, Siemens Limited, Windmill Road, Sunbury on Thames, Middlesex TW16 7HS. Tel: Sunbury on Thames (09327) 85691 extn 322.

A Caring Approach

You may have heard the saying -- "You can be nice, or you can be effective". At Gordon Yates, we believe you can be both.

For more than 30 years we have been helping secretaries to find fulfilment at work. Career aspirations and job problems are often deeply personal matters. We look for best solutions — whatever they may be -without haste, prejudice or pressure.

The approach is effective. In the last few years our business has grown five-fold, and is still growing. Presently, we are looking for an additional consultant to join us. Could that person be you? The position is a demanding one. Relevant experience is obviously

helpful. However, actitude and natural aptitude are of first importance, and training will be given where required. We give our consultants full support, including secretarial,

trative and research assistance. Telephone canvassing is not part of the job. Rewards (which are high) are reflected in salary rather than commission, and are kept under regular review. If you are 25-35, and would like to know more, please write or

SECULE I AHY to the frame a Operations Manager. CE7,000. A young audio shorthand secretary is needed to organise the trafficking of all our feature films. You'll be expected to work on your own initiative, do your own correspondence and have a great deal of telephone contact with major film companies. For both positions, a knowledge of "Wordstar" is useful but we would train. The successful applicants would be expected to join in with the day to day work load of a very busy and demanding team. In the first loatance please send CV to: Flona McTadzean

TEN — The Movie Channel Fanum House, 48 Leicester Square, London WC2H 7LZ

PRESS OFFICE SECRETARY £7,540 P.A.

Age 24+, required by the Financial Times Newspaper to join his busy Publishing department. In addition to sec-returnal skills, good organisational ability is required to deal with the administration of P.R. functions. Applicants must have a good educational background, 50 w.p.m. typing, some word processing experience, and be articulate. Previous experience of a Press Office would be an advantage.

Please apply for an application form on: 01-236 9758

The Personnel Officer. Financial Times, Bracken House, 10 Cannon Street, London EC4P 4BY.

PA/Secretary

to General Manager Thames Valley up to £11,500

This young, profitable and fast-expanding division of a world leader in fast-moving consumer goods specialises in the export marketing of well-known branded grocery products to over 100 countries worldwide.

Reorganisation through growth has created this excellent opportunity for a suitably experienced executive secretary to work for the General Manager. In addition to providing the full range of PA/secretarial services, you will be expected to control the administration of a technologically sophisticated international office environment, to organise overseas travel arrangements, and to 'hold the reins' effectively in the General Manager's frequent absences abroad. Your first-class secretarial skills should therefore be backed by organisational flair, diplomacy, 'polish'
— and, above all, commitment. In addition, a
knowledge of French would be a distinct advantage.
Salary, in a range from £9,000 to £11,500, is
backed by a comprehensive non-contributory benefits

If you are at the top of your profession and are attracted by the opportunity of joining a dynamic international consumer company, write with full cv to the address below, quoting ref: \$3142/T on the envelope. Your application will be forwarded to the client unopened, unless marked for the attention : our Security Manager with a note of companies which it should not be sent.

. BELGRAVIA . SW1

By Christopher Warman Property Correspondent

The fate of Britain's fine historic houses is mixed. Some, the smaller ones, remain as family homes for rich or dedicated owners; but many have to be converted to some other use to

They are now botels, institutions. flats or time-sharing units, but at least they still stand. Grovelands House at Southfield, Enfield, a Grade I listed house which is considered one of the finest Georgian mansions in Greater London, faces dereliction or possible demolition unless decisive action is taken soon at government level, according to SAVE Britain's Heritage.

This campaigning organization says that the owners, Enfield Area Health Authority, are seeking a sale price of up to £500,000 for the building. The only serious interest has come from developers wishing to build substantial extensions on the site, which Enfield Borough Council has resisted because they would ruin the setting of the house. The Council believes there is scope for only a very limited development on adjacent land, and neanwhile "Grovelands is quietly rotting", SAVE says.

Grovelands was build in 1797 to

the design of John Nash, architect of. most of the splendid terraces around Regent's Park, with the grounds laid out by Humphry Repton. It was planned as an eighteenth century villa and is not too vast. It has been described as Nash's best classical mansion and the interior is remarkably intact.

After a period as a hospital, it was closed in 1977 and has since then stood empty and slowly decaying. Dry rot, which started in ancillary buildings, has now attacked the house seriously. Most of the surrounding park is already owned by the borough council, and local residents' groups have campaigned for the house to be acquired by the local authority for use as a museum.

The best interest

SAVE comments that Grovelands is as much a burden as an asset to the Health Authority, "which would be well advised to revise its estimates of the building's value in the light of its poor condition and limited develop-ment potential." The borough council has limited powers, in view of the Crown status of the authority, to ensure that the house is properly maintained, and SAVE urges the Secretary of State for Health and Social Security to ensure that the bodies for which he is responsible act not only in their own best interest but in the wider public interest."

Grovelands House remains to have its future decided. Clearly it must be saved. A number of listed and historic buildings on the market now shows: bedrooms. Many of the original features remain, including an oak staircase, carved wood showcases and

marble fireplaces. All the flats are spacious, particularly those in the older part of the House, and they range in price from £42,000 to £86,000, each of them interestingly different. Details can be obtained from Pearce Homes, Parklands Stoke, Gifford, Bristol, or Hartnell Taylor Cook of The Mall, Clifton, Bristol.

Another prospective conversion to flats is Dane Court. Tilmanstone, near Deal, Kent, a sixteenth century house which has recently been restored and modernized. At some point it was given as a wedding present to Edward Royde Rice and Elizabeth Knight, niece of Jane Austen.

Dane Court has planning permission to convert two flooors of the main house into five flats, and there is the possibility of converting the ground floor into three flats with mews cottages at the rear, say Humberts, who are asking £400,000.

Walton Hall, near Stratford upon Avon, Warwickshire, a Grade II listed building designed in the mid-nineteenth century by Sir George Gilbert Scott, has recently been a hotel and is now comverted to 43 self-catering timeshare apartments and a health farm. It has been developed in this new use by Graham Maynard, who has been busy developing in Spain, and has now formed Walton Hall Limited to sell the apartments, set in

Grovelands House, Enfield, London, a Grade I Georgian house in danger of dereliction or demolition unless a new use can be found for it.

the variety of ways in which these buildings can remain in use.

Kneesworth Hall, by the village of Bassingbourn-cum-Kneesworth, near Cambridge, was built in 1908 by the then Sydney Holland, later Viscount Knutsford, from designs by the London architect Roland Plumbe. The Grade II listed mansion, set in 47 acres, was a private house intil 1940. when it has been used as a

The Hall has had later additions. but the main building includes 6.930 square feet on the ground floor, 29 bedrooms and two flats. In addition there are four classroom blocks, 13 staff dwellings and a gymnasium. Savills' Cambridge office are offering the property for sale by tender on November 16 and are thinking of a price ranging from £500,000 to £1m depending on the use to which it is put. They believe it could be a high tech research and development establishment, hotel, hospital, art gallery, exhibition centre or religious

school.

institution. Cornwallis House in Clifton. Bristol was built in 1753 for a Bristol attorney. Henry Hobbouse. It is a very large house, and was later used as one of the lodging houses needed to house the fashionable and ailing people who came to drink the spa The House, a Grade II listed

building, with a 1930s west wing, was more recently a school until 1982. Occupying a grand site in Clifton; the House was acquired by Pearce Homes of Bristol, who have carried out an extensive and expensive renovation programme while converting it to 21 apartments of one, two and three

LONDON FLATS

An alms house for the not-so-poor at Ridge, a village between Barnet and St Albans, is for sale at £21 5,000 through Strapsons of Chequer Street. Si Albans, The house, Orchard Mead, believed to be one of Sir Gilbert Scott's first conventations, was built in 1850 of track and first with a slate roof and leaded light windows.
Originally a lemace of five alms houses, it was converted to a single residence in 1950 and is set in a conservation area. It has three reception rooms, six bedrooms, two hedrooms and a substantial garden. with a double garage.

Jackin colling authoress of novels.
that almost smoulder in you hands, is selling her live-bedroom house in: Hamilton Texace, Sin John's Wood. extensive gardens, is expected to fetch about £425,000 through Barguts of Park Road, Regent's Park.

Kew-on-Thames

Zachaer House, a riverside house at Strand on the Green near Kew Bridge, to for sale through Chesterions. of Kensington High Street, London W3, who are asking for offers over 1450,000. It began as two cottages in the early 1700s which towards the end of the century were converted into a single dwelling, bought in 1797 by Anne Marie Zachary. Accommodation in this house. sinated in a conservation area, includes a principal bedroom and athroom, five further bedrooms and two bathrooms, three reception rooms, a self-contained one-bedroom

flat, and a walled garden: St Mary's, Bramber, near Sterning, one of the finest late-fifteenth century, timber-frame-buildings in Sussex, is on the market after the sale of the National Butterfly Museum which was housed there. The Grade I listed house, built in the 1470s, has five bedrooms, large reception rooms and a three-bedroom flat. Strutt and Parker's Lewes office are asking for offers over \$150,000.

How gardens grow Gardens are growing smaller as more people demand one. According to a Mintel survey, 86 per cent of adults have access to a garden, but one in five is less than 200 square feet

and fewer than one quarter are more than 2,000 square feet, At the same time, the sale of power tools to lend gardens continues to increase and the result of that is more leisure time. This is reflected in the growth of garden furniture, which is expected to reach £50m in 1984. The survey shows that 42 per cent of homes own a patio set, the same proportion have a sun lounger. 39 per cent have folding garden chairs and 29 per cent have upholstered garden chairs, while 21 per cent have a

hammock and 20 per cent a garden-

umbrella.

In the 1850s. Lord Barringdon and his wife returned from their honeymoon in Switzerland determined to build a replica of the chalet in which they stayed. Swiss-Cottage, Northford, Shrivenham, Oxford-shire, was the result and is now for sale through Knight Frank and Rutley's Hungerford office which is seeking offers around £65,000. The cottage, which became a playhouse for the Barringdon children, has four bedrooms and two reception rooms and requires modernization. The brick built cottage, faced with organiental rough-cut timber with a thatched roof, has about three-quarters of an acre of land; with possible planning consent for a single dwelling

Right time, right place

The search for the best time to sellyour house is a tempting but elusive goal, particularly since the best time to sell - whenever it is - is probably not the best time to buy.

RESIDENTIAL PROPERTY

One possible answer to the search, however, comes from Tim Blenkin, director of the York office of Jackson-Stops and Staff. His conclusion is that for many people wishing to sell their house, the time to act is now. On the premise that the buyer of a house costing £60,000 to £120,000 is likely to be a married man moving to a new job, he will want to ensure that his children are in their new schools at the start of the academic year and will therefore aim to complete his purchase by August. So he will want to have exchanged contracts in June/July, having agreed terms in. May or June, and started looking in February or March.

This progression coincides with the acknowledged prime time for selling -March to June, and Mr Blenkin says in that case, the illustrated details of the property will need to be prepared the preceding autumn "while there are leaves on the trees and blue skies to provide suitably flattering photographs. And to be honest. September and October are good months to call in your agent with a view to a sale next year. We tend to be quieter than in the heetic spring months, and are glad of the extra time to make a

thorough job of setting up a sale." This must be the season for giving advice, because Mr Peter Marwick of Savills is offering suggestions for "the

perfect purchaser". He is one who is able to proceed, either with eash in hand or a signed contract on the sale of his existing property, but un-fortunately for estate agents he does not often materialize.

He advises buyers to work out how much they can afford, not forgetting fees for removal, lawyers and estate agents and then decide where to live. That seems obvious, but Mr Marwick adds. "It is surprising the number of prospective purchasers who are apparently willing to spend time and money inspecting homes in areas which they subsequently decide are too far from their place of employ-ment or from schools, bus services and other essential amenities."

A recent prospective buyer told Savills he wanted a property between Norwich Ipswich and Birry St Edmunds to be within reach of his "We later learned that he purchased a house in north Wates", a Savills executive said. "We are still wondering where he works."

More seriously; Mr Marwick against over-ambition. Remember older properties need more maintenance, that an acre of garden needs a lot of work, that if you want a rural home do not expect all the main services and that if you want all the services on your doorstep. expect to hear traffic noise.

Unfortunately, like the perfect purchase, the perfect property seldom

YOUR LAST CHANCE ...

Those considering maiding a move to sell Country Houses in the spring of next year, should consider this and next week to be the very last chance to take photographs of your property. There is no better way to present your property for sale than with good colour photographs. Take them now with the leaf on the tree rather than bare branched in early spring. Shoot now - reap the benefits later.

Flemoboards Palement and Electricity ..

The above recommendation is just one of the "wrinkles" in the art of selling property. Why don't you contact the Marketing Department at Humberts for a 01-629 6700

was probably much worse than what has been left in. But Mr. Henshaw's brief is not limited to exploring the fiendish ingenuity of the Turkish military authorities in trying to make their victims talk. He poses the question that many of us, reading The Times on Monday and ask ourselves: is it for the sake of

Western defence that Turkey's fellow nations in Nato and the Council of Europe continue to turn a blind eye to this systematic brutality

 Nobody in The Forgotten Prisoners dares to justify torture, Not so Stephen Dunstone's tragi-cornedy WHO IS SYLVIA? (Radio 3, 7.30pm), which is set in a medical research laboratory. This is a remarkable play that, in mood, swings between the homibly cruel, the our ageously furny, and the touchingly sensitive. I have vivid memories of it from its first transmission, and nothing will prevent me from listening to it again. If you need a further incentive to tune in to John Tydeman's production, let me remind you of its cast: Michael Airidge, Anna Massey, Nigel Hawthome, Martin Jarvis, and

Dr Runcie speaks to Brittan on race fear

By Clifford Longley,

A Church of England depu-tation led by the Archbishop of Canterbury, Dr Robert Runcie. saw Mr Leon Brittan, Home Secretary, yesterday to tell him that the British Nationality Act was having an adverse effect on race relations.

Also yesierday, a Roman Catholic report criticezed what it said was insufficient awareness of the implications of a multiracial society within the church and proposed Roman Catholic sponsorship for an experimental "multi-faith"

The Anglican visit to the Home Office followed a motion passed by the general synod last February, which was part of the continuing campaign by churchmen against the Act.

Dr Runcie told the Home

Sectretary that the church was concerned at the effect of the Act on families and individuals, and he outlined steps the Government might take to alleviate those difficulties. Mr Brittan replied explaining what had already been done in those respects, mentioning an internal Home Office review which had aired some criticisms. The church denutation acknowledged that the Home Office was looking for improvements.

Dr Runcie said afterwards that Mr Brittan had offered to let church representatives visit the immigration service at Heathrow and other centres to see it at work.

The report of a working party on Roman Catholic education in a multi-racial society con-cluded, after a survey of 50 schools, that little was being done in predominantly white schools to educate children against racial prejudice.
The four seminaries visited

lacked an explicit commitment to training priests for coping with a racially and culturally diverse society, the working party said; although it added that two had addressed the question of non-christian religions seriously.

Some students from overseas at those colleges had complained that they were made to feel that they were outsiders, and the working party asked seminary authorities to look at themselves critically in the light of such comments.

Soviet submarine under repair

Collision victim: The Soviet nuclear submarine, her bows badly damaged, awaits repair work at Hammarnet, Tunisia.

The full extent of the caused to a Soviet nuclear submarine iu a recent collision in the Straits of Gibraltar is shown in a new photograph of the boat undergoing emergency repairs in the Mediterranean.

The collision between the Victor 1 class nuclear attack submarine and a Soviet cargo ship has caused a dispute between Spain and the Soviet Union. The Spanish Govern-ment wants to know why the submarine passed through the straits under water, contrary to the Geneva Covention of 1958 which insists all vessels there should travel on the surface.

The British magazine Jane's Defence Weekly, has acquired a photograph of the submarine being repaired in Hammamet. Tunisia.

She was probably travelling very close to the Soviet surface vessel when they collided moving in her "noise shadow" to make sonar detection diffito sip from a glass of water as he

tainers dave an industrial victory in their grasp. But Mr. Scargill wants a political victory." It adds: "At a time when Britain desperately needs an alternative to the present. Tory Government, Mr. Scargill is impeding any hope of it." The paper says "There is now no industrial.

says. There is now no industria

reason why this strike should go on. Only a political one. And that is the worst reason of all."

Portfolio

Mob of 50 attacked woman sergeant

Continued from page 1 Police said that up to 300 people had been trying to take coal, and

19 of them are to appear before Barnsley magistrates tomorrow. Police were stoned and barricades erected across ap-proach roads to the colliery, but the real trouble began early next morning and yesterday south Yorkshire police issued their timetable of the main trouble.

Monday: em: Lorries loading coal at the colliery came under a barrage of stones from a gang of youths and police were called out, but by the time they arrived the trouble had fizzled

8 am: Lorries at the yard were again stoned and their drivers fled. A coal board mechanical loader was also abandoned by its frightened driver, and then set alight and destroyed by the

gang.
12.50 pm: Grimethorpe police station, a detached house on Nancy Road, behind the Red Rum public house, was stoned by a mob. The building was numanned at the time and six windows were broken.

2.10 pm. Sergeant Smith and Police Constable Ernest Web-Police Constable Ernest Web-ster, aged 41, arrived at the station with two joiners to supervise repair work. Seventy youths gathered outside and began throwing stones. Every window in the building was smashed, and internal fittings damaged

Sergeant Smith ordered her colleague and the joiners to make a run for it. "We shot through the back door, jumped the fence, and started running across the field at the back"

"I heard shouting glanced back, and saw at least 50 of them running after us. Then the stones started coming. I was brought down by a rugby tackle. It was terrifying. I was kicked twice, and then one of the youths said: 'It's a woman. We don't want women. I was kicked again, and then they ran off after Constable Webster."

pm: A crowd again gathered at the local colliery and threw tones at the control room,

11 pm: As the public houses emptied police reported gangs of youths breaking shop win-dows in the village high street. There were seven arrests and five policemen were injured. 1.15 am: Police were called to Grimethorpe colliery, where an attempt had been made to burn

down the manager's office.

Letter from Hamburg

Tributes to an ace sleuth's gullibility

They studiously avoided each other as they stood around in the lofty marble corridor waiting for the court session to begin: the one a former reporter, gullible, eccentric and inept who paced up and down, smoking, abstracted, occasionally talking to his lawyer, the other a bright-eyed, wise-cracking con artist who revelled in the television lights and his

notoriety. But Herr Gerd Heidemann, the reporter, and Herr Konrad Kujau had between them fooled respectable academics and experienced editors to pull off one of the greatest hoaxes of all time, by forging and peddling 60 volumes of Hitler's long-lost diaries. Somewhere along the line, the babless. Stern magazine had hapless Stern magazine had lost DM 9m (£2.4m).

Herr Kujau had no qualms. about boasting to the knot of spectators casually gathered around him of his mastery of the Führer's hand. I told him The Times had been particu-

larly interested in the diaries.
"You should have come straight to me", he said. "I could have written some good ones for you".
It has been hard to take the

trial seriously. The bizarre revelations have been as incredible as the diaries themselves, and the indulgent, silver haired chairman of the panel of seven judges has had trouble controlling the bilarity. The initial sessions have included the appearance of a Hitler double (an unemployed house painter from Stuttgart). a slide show of Herr Heidemann's Aladdin's cave of Nazi memorabilia – including, unaccountably, Idi Amin's outsize underpants bare-

breasted pinups in army uniform by Herr Kujau, who had naturally signed them "A. Hitler", and general commotion when one of the judges had to be replaced for sleeping through the entire proceed-

Herr Heidemann and Herr Kujau have both given their evidence, as has Herr Kujau's roly-poly common-law wife, who set up with him over his Stuttgart uniform and memorabilia shop and who is jointly accused of fraud. It was now the turn of Herr Fritz Stiefel, a slight, 55-year-old Stuttgart businessman and Third Reich

He seemed to have bought unquestioningly anything Herr Kujau could forge or procure - swastikas, flags,

and even, incredibly. Hitler's dental charts. Herr Kujau bad toyed with the idea of offering for sale an opera written by Hitler, but gave this up as too time-consuming - he would first have to learn music.

The sums envolved were enormous. Did they amount to DM300,000, Herr Heidemann's counsel wanted to know? Herr Stiefel could not, or would not remember. What did he pay for Mein. Kampf - DM22,000? What else did he find in Herr Kujau's shop, what paintings: any Rembrandts, Rubens? No.

replied Herr Stiefel gravely. Herr Heidemann's defence counsel believes all this money can be traced to Herr Kujau, and the trail will eventually lead to the missing Stern millions, thus clearing Herr Heidemann of embezzle-

Would Herr Stiefel say he gave Herr Fischer. Herr Kujau's alias in his business dealings, a total of DM2m? You must be joking". Herr Heidemann sat silent, every word a tribute to his guilli-

selves. When did Herr Stiefel first hear of their existence. and how many were there? "It was about nine years ago. I remember talk then of six or seven." Did he talk about them to Mr David Irving, the British historian? No. Did he not wonder that something like this had supposedly come out from East Germany? No, they were meant to have been hidden. What about the wax seal on them: did Herr Stiefel recognize this as the same emblem as on his other Nazi bjects?

The afternoon session consisted of another slide show, this time a view of the treasures that Herr Stiefel had amassed since he began collecting in 1972. An oil portrait of Rommel was flashed on to the screen. "Achja," remarked Herr Kujau,

sharp questions will be posed to witnesses who are far from eager to be seen in such company: the publishers and executives of *Stern* who gave Herr Heidemann the go-ahead and the huge sums to pursue
